Shareware Utilities

Here's a group of indispensable Shareware Utilities no Mac Power User can do without.

isinfectant

by   Northwestern University
         Scan for and remove viruses from all of your disks! You can even install a protection program to prevent future infection!

Graphic Converter

       by Thorsten Lemke
         Open, edit and convert every picture format from GIFs to TIFFs with this handy utility.

          Software FPU
           by John M.   Neil
           Emulate a Floating Point Unit with this handy system Extension.

SoundApp

by Norman Franke
Plays and converts sound files into a number of formats including WAVE, AIFF, System 7 sound, QuickTime MooV, and more.

Stuffit Expander™

by Aladdin Systems, Inc.
The standard in Macintosh decompression programs.   Drag'n Drop archives (".sit", ".hqx", etc.) onto the icon and it will automatically expand it.

Stuffit Lite™
by Aladdin Systems, Inc.
Compress and extract files or create self-extracting archives.   Save room on your hard drive by archiving rarely used programs and clip art.

iewFont

by John V. Holder
View every character of every font installed on your Mac.   You can also find out the key combinations to get a certain character.

ZipIt
by Tom Brown
Zip and unzip archives from PC users.   It's fully compatible with PKZip and all other standard zip implementations.
