

## INSTALLING TRUETYPE FONTS

Installation of a TrueType font with System 7 and Mac OS 8 is simple. Drag the TrueType suitcase on top of your System Folder and drop it. That's it! The system will place all the files in the correct folders after you select the OK button in the window below. You may double-click the individual font icons inside the suitcase before installing to see a preview of the font.

NOTE: ANY PROGRAM OPEN DURING THE INSTALLATION WILL NEED TO BE RESTARTED BEFORE YOU CAN USE YOUR NEW FONTS IN IT.

## INSTALLING TYPE 1 FONTS

System 7 and Mac OS 8 users, drag and drop both icons on top of your System Folder. The system will place all the files in the correct folders after you select the OK button in the window similar to the one below.

OTE: IF YOU ARE USING SYSTEM 6 YOU WILL NEED TO ACQUIRE THE TRUETYPE INIT FROM APPLE.
