

Best of...

Enter the World of Arcus 2001. Where high technology and erotica merge as one. Our goal at Arcus is to provide you with the highest quality adult CD-ROMs available. Experience exceptional video and audio quality of full screen, full motion action that surpasses any CD-ROM movie on the market today.

The Arcus 2001 Product Line now includes Virtual Valerie 2, the much anticipated sequel to the wildly successful game that turned the cybersex community on its head with its stunning graphics and groundbreaking interactivity! State of the art computer modeling, mind boggling animation, tantalizing sound effects, and a sizzling musical score combine to create an erotic sextravaganza like nothing you've ever experienced before. Valerie is back, and she's horny as ever.

ADDRESS:

Arcus Media Group
One Metro Park Drive
Cranston, RI 02910

INSTALLATION:

Best of... requires Apple's QuickTime for Windows 2.01, which is included on the disc.

To install, run the INSTALL.EXE program in the ROOT directory on the CD-ROM. The installation program installs QuickTime for Windows onto the harddrive of your choice and creates a program group and icons in the Program Manager called which point to the CD-ROM drive applications.

Simply click on the Best of icon in the ARCUS program group to start. Allow 5-45 seconds to load depending on your system- keep your eye on the drive light.

OPERATING THE Best of...:

When the player appears on the screen, drag one of the movie icons to the viewing screen. Changing movie segments is just as easy, Just drag the next one into the window.

The three buttons at the bottom of the viewer are to control the movie. The top left button will allow you to pause, restart or fast-forward the movie segment. The top right button allows the user to switch between the two screens full of clips or to quit. The bottom button allows the user to adjust the volume.

SYSTEM REQUIREMENTS:

To view the movie you should have a 386/33 or better CPU with 8-bit (256 color) or better graphics, a sound card, Microsoft Windows 3.1, DOS 5.0, and a mouse. Your PC should have at least 4MB of RAM, and a double speed CD-ROM drive. A 486/66, 8 megs of RAM and Hi-Color (32,000 colors) is highly recommended.
