

# GENERAL INTEREST

CD to AIFF v1.2c

by Tim Cask

Record audio from CDs and save them as AIFF sound files. Set sample rates, sample sizes and channels (stereo, mono, left or right). Perfect for capturing your favorite CD audio tracks and turning them into Macintosh sounds.

Darkness v3.1

by Futoshi Ebata

Protect your computer screen from burn out! This simple screen saver dims your screen after a certain period of inactivity. Set the brightness from 0% to 80%, and the delay before dimming. Instantly dim the screen by dragging the mouse to certain "hotspots" on the screen. You can also configure this screen saver to not dim while specified applications are running.

Dragon Fyre — Issue 4

by the Zodiac Group

This continuing story of super hero Dragon Fyre and his amazing adventures. In this issue, Dragon Fyre gets caught in a fight between Rokor and Aalto. The graphics in this comic book adventure are amazing!

Bonus: In case you missed them, we've included the first three issues.

MAC n TV v2.0

by Bill Bouch

Organize your QuickTime movies with this previewer/viewer. You won't have to go hunting for your movies, loading and unloading them, trying to remember what they look like. This program collects all of your QuickTime movies into one small file. All movies in your collection are shown as previews at the bottom of the screen. Click on one and the movie is instantly opened and played.

SoundMaster v1.8.2

by BruceTomlin

Do you hear what I hear? Assign sound effects to practically any computer function. For example, play sounds when you insert a disk, shut down or open a window. There are 30 different functions.
