

Gas Miles

Version 1.1 - Shareware Edition

Thanks for trying **Gas Miles**. **Gas Miles** is a great tool to track the gas mileage of your car. Simply enter the number of miles driven and the number of gallons used and **Gas Miles** will calculate your miles per gallon (MPG). You can record up to 10 entries and **Gas Miles** will track your average miles, gallons and MPG's. You can then view a graph of your MPG's.

Gas Miles is easy to install and even easier to use. It does require the file VBRUN300.DLL which is not included in the shareware version. If you do not have the file VBRUN300.DLL it can be obtained from most BBS or Online services.

To run **Gas Miles** simply go to File Manager, locate the file "gasmil11.exe" and double-click on this file. You may want to go to Program Manager and set up a program item in your favorite window. See your Windows manual for instructions.

Any comments, suggestions for improvement and bug detection are greatly appreciated. Simply write to us at **SmartCo1@aol.com**.
