# Overview of LifeTime

## Personal Information Managers

LifeTime is a member of the family of software products called Personal Information Managers("PIM" for short). A PIM lets you use your computer to aid you in keeping track of your schedule of daily appointments, and your non-scheduled list of "things to do". Beyond that, PIMs vary in their inclusion of additional features - the better PIMs, like LifeTime, will always allow you to: attach Alarms, Priorities, or Due Dates to items where appropriate; keep extensive notes attached to your schedule or To-Do items; maintain a Phone Book with AutoDial capabilities; Print your Schedule and To-Do lists, Notes, and Phone Book information; and Find any given text string wherever it appears within the stored information.

## The LifeTime Advantage

Although there are many PIMs on the market, including a large number of Windows PIMs, users are often frustrated by the difficulty or awkwardness in using them. They may have all the features that a user needs, but not much thought went into making those features easily accessible. Some people give up on PIMs as a result of this frustration.

### Ease of Use

LifeTime was designed from the ground up with ease-of-use as much in mind as quality of features. For instance, since the single most important function required of a PIM is to store the individual items relating to appointments or things to do, why should it be anything but utter simplicity to enter them? Yet PIM after PIM will make you pull up a separate form to type in your item, then make you jump through some more hoops to set a start time and end time for it. In LifeTime, the main screen is always ready to start receiving the next item - you just start typing. When you hit Enter, the item becomes an object that you move with your mouse along a timeline to set the start time; then you shape the height of the object with your mouse to set its duration. This quick and intuitive method produces an added bonus - your screen always shows your appointments as time blocks, and the blank space shows you exactly where your free time is.

### Visual Cues

Another LifeTime innovation is its use of visual cues (color and texture) to convey information. Why should you have to search for a little "A" to the left of items to find the ones that have an alarm - or a little "N" for an attached Note? If your item in LifeTime has an alarm, it's unmistakable - its text is red (by default). Similarly, an item with an attached note is recognized immediately by its italicised font.

### Popup Technology

Wouldn't it be nice to be able to quickly see the schedule and To-Do items for any other day while still keeping today's items in place? Well, LifeTime has an exclusive "Popup Schedule" that does just that when you click on any calendar day with your right mouse button. A similar "Popup" motif allows you to instantly access any of the properties of an item. Little things, maybe, but it's the little things like these that clearly set LifeTime apart.

### Animated Tutorial

In the interests of getting you off to a quick start in your use of LifeTime, we have included an animated Tutorial which demonstrates some of the features we talked about above. If you've already seen it, we hope you enjoyed it. If not, you can access it from the Help menu.

# Letter From the Author

## Dear LifeTime User,

The wonderful reception that LifeTime has received since its initial release in July of 1994, has proved to me I was right in thinking that there was a market in the crowded Windows PIM world for a product that has almost no 'learning curve', but provides all the important information management functions most people need.

When I surveyed the current PIM "scene", not only to see what is available, but what computer user's reactions are to what is available, I noticed some interesting things. First, there is a class of what I call "Mega-PIMs", which do everything that's reasonable to expect of a PIM - then they add on massive additional features that do such things as Project planning, Outlining, or intensive Contact management. These features may be needed by some people, but they may be better served by getting a separate package for the specialized feature instead of paying a mega-price for the Mega-PIM.

Then there are the products that do stick pretty much to the classic PIM features, which is all the vast majority of potential PIM users need. I consider LifeTime to be in this category - but, with a difference. Many users have reported frustration as they try one PIM after another, only to find them all awkward to use. It's true - none of the PIMs out there til now have seemed to operate with the intuitive ease and friendliness that the majority of PIM seekers apparently crave. From this I recognized there is a vast, untapped market that LifeTime can fill - the market for a PIM that is not only user-friendly, but is actually fun to use! LifeTime elevates mouse usage to a new height in the PIM world. You can drag-and-drop, drag-and-modify, drag-and-print, drag-and-dial, drag-and-view, and mouse-click your way to the Time-management efficiency you always suspected a computer could provide.

This major upgrade to LifeTime continues the same philosophy that guided the original release. Rather than weighing it down with new features, this release makes the existing features even easier to use, and guided by suggestions from you - the users, some very significant improvements have been added:

- Because YOU wanted a WAV sound file option for the Alarm, it's in there!
- Because YOU wanted an improvement in the 'one page per day' printing functions, the Print has been completely rewritten from scratch, and now includes customizable headings, multiple formats, and Print Preview!
- Because YOU wanted a 'first Tuesday and third Thursday' type recur option, you now have it!
- Because YOU wanted an Ascii import for Phone data from other products, you now have one!

I invite you to use and explore this Evaluation copy of Lifetime as my guest for the next few weeks, to see what a difference it can make in helping you organize your life, work, and related information. This try-out period entails no cost or obligation to you. It is my hope that you will be impressed enough to want to obtain a registration license for your copy, which will come with a professional manual and other goodies which are themselves worth the \$29.95 registration fee. If you decide not to register, I request that you discontinue using the product and remove all copies from your computer - this is not free software, and the fact that there is a free evaluation period does not mean the use of this product is legal beyond the three-week period without registering it. As the free Evaluation period comes to an end, you will be reminded gently but insistently that the time to register is at hand, though the product will continue to operate. I regret having to include such "reminders", and it was bothersome to build them into the product, but the way I look at it is: if I didn't include the reminders, I would be placing the temptation in front of good, honest people to start putting off their registration until later, with "later" never seeming to arrive.

## Acknowledgements

LifeTime's data access is accomplished through VB/ISAM™ from Software Source. If you appreciate the fast data access provided by LifeTime, you can thank their fine product.

Sincerely,

A handwritten signature in black ink that reads "Stephen B. Uber". The signature is written in a cursive style with a large, prominent initial 'S'.

Stephen B. Uber

## Installing LifeTime

The LifeTime install is simple, and does not update any of your Windows system files.

### How to Install

- 1 Put the diskette with the LifeTime program files into your diskette drive.
- 2 In Program Manager, pick "Run" from the File menu, then type A:\SETUP.EXE as the program to run.
- 3 The Setup program will ask you where to place the program files. It will suggest a directory called C:\LIFETIME, but you may change that if you wish.
- 4 The Setup program will then copy all the files into your specified directory and create a LifeTime icon within its own program group.

See Also

[Network Use](#)

## **Network Use**

Each user of LifeTime on a shared network must have the program files installed on their own hard drive. By default, LifeTime stores your items, notes, and phonebook information in datasets located on the same drive and directory where you have the program itself. If space is limited on this drive, you may choose to locate this data on another drive, in particular a drive that you can access through a network that you are connected to. Another reason for doing this is if you are part of a team or workgroup, all of whose members are using LifeTime, or may be in the future.

You would want to be on a shared database in this situation, because then the database as a whole could be administered by the workgroup's leader or someone else given that responsibility. The administrative activities would include group scheduling, that is, discovering what are the time blocks when no one on the team has an item scheduled, and optionally creating a new item that would appear on everyone's list. The tool for achieving this is the LifeTime Network Administrator's module, which will be made available soon. All interested registered LifeTime users will be sent an offer when this module becomes available.

### **Installing on a Network**

To use LifeTime on a network, each user must perform the normal install to their own hard drives. Then each must point to the common network path where the database is to reside.

### **How To**

[Install LifeTime](#)

[Set a Network Path](#)

[Set your Network ID](#)

[Set your Active Path](#)

## Setting a Network Path

A network path lets you keep your data off your own hard drive, and it can be stored in a common location with that of other LifeTime users in your work area. This allows for group scheduling and easier database administration, with LifeTime's optional Network Administrator's module.

### Instructions

- Select the "Network Path" option under the "Network Use" pick of the "File" menu.
- Type in the full drive and path information, with this format:

N:\TEAMA\LIFEDATA

- Hit Enter

See Also

[Network Use](#)

[Setting Your Network ID](#)

[Setting Your Active Path](#)

## Setting Your Network ID

Your network ID is a unique "key" by which your personal information will be labeled on a shared network drive, so it must be different than that of any other user using the same path. A good choice for a network ID would be your LAN security ID, but any unique character combination up to 8 characters will work.

Note: Although you may change your network ID after you establish it, doing so will leave you unable to revert back to the earlier ID, so data entered under it will be lost to you.

### Instructions

- Select the "Network ID" option under the "Network Use" pick of the "File" menu.
- Type in your unique network ID.
- Hit Enter.

See Also

[Network Use](#)

[Setting a Network Path](#)

[Setting Your Active Path](#)

## Setting Your Active Path

Once you have established an optional network path, you may make it your "official" path that comes up automatically when you start up LifeTime. You may then at any time switch this "official" path back to the original database on your own drive that LifeTime established for you when you first ran it.

### Instructions

- Pick the "Path" option from the "Settings" choice of the "Options" menu. The Path Window appears.
- Select the radio buttons that specify the path setting you want. Note you may point at a Phone Book on your "original" path while pointing to Schedule/ToDo data on the network drive, or vice versa.
- Click the "Ok" button, or hit Enter.

# Registering your Copy

## Why Register?

Your use of LifeTime is intended to be free for a limited time of 3 weeks, so that you can decide whether it suits your needs. If you intend to use the product beyond this period, you are required to pay a fee to Amber Timbre Software for the registration of your copy of LifeTime. In return, you get a Registration Key file, which uniquely identifies your copy and eliminates all registration reminder prompts when you run the program. Registration only costs \$29.95 (plus \$5.00 for handling), for your first copy. If you order more than one copy, each additional copy will cost you only \$19.95, with no additional shipping charges. At no extra charge, you also get the following for each copy you order:

- A professionally printed User's guide that serves as the perfect companion to the Help file. It includes screen-print illustrations and 'Power-user' tips so that LifeTime can enhance your productivity to the maximum.
- A Database Maintenance utility that allows you to Archive, Backup, or Purge the older data you no longer need to refer to all the time. You can Restore it again later if you do need it. With all the important notes and other information you will be putting into LifeTime, you really need this utility. Complete with its own Windows Help file.
- A Report Writer for printing out powerful summaries of your data (for example, a list of all completed To-Do items, as the basis of a progress report). Complete with its own Windows Help file.

[How to Register](#)

# How to Register

## By Credit Card

You can order single copies with MasterCard, Visa, American Express, or Discover from PsL by calling 800-242-4775 or 713-524-6394. These numbers are for ordering only - they will not provide technical support. Questions involving your order status or technical support must be directed to Amber Timbre Software. See "Technical Support" in this Help file.

## Through Compuserve

Members of the Compuserve service may register online, FOR SINGLE COPIES ONLY, and will be billed by Compuserve. Just type GO SWREG to get to the registration facility. LifeTime's Registration ID is 2855.

## Through the Mail

Payment must be in U.S. dollars. The cost to register one copy of LifeTime is only \$29.95 (Plus \$5.00 shipping and handling). Total payment of \$34.95 may be made by check or Money Order. If you are ordering more than one copy, add only \$19.95 for each copy after the first. Please fill out and print the LifeTime order form you will find by clicking the "Order a License" pick under the LifeTime main Help menu. Please send a copy of the order form with your payment to:

Amber Timbre Software  
P.O Box 380732  
East Hartford, CT 06138-0732  
U.S.A.

- Orders from Connecticut only must add state sales tax (\$2.10) for a total cost of \$37.05. For orders of more than one copy, in Connecticut add \$1.20 in state sales tax for each extra copy you order.
- Orders from outside the United States may include payment (in U.S. dollars only) in one of the following forms: A check drawn from an account in a U.S. bank; an American Express Money Order; an International Postal Money Order; or U.S. currency (\$35.00).

## **Technical Support**

Amber Timbre Software provides to users of LifeTime, at no charge, assistance in the solving of technical problems encountered in the installation or running of the program. This assistance will take place via correspondence through the channels noted below.

### **CompuServe and America Online**

Correspondence will be in the form of private E-Mail to members of either of these services.

- CompuServe Address: 72202,2403
- America Online Address: ATSoft
- Internet Mail Address: atsoft@aol.com

### **Direct Mail**

- Amber Timbre Software  
P.O. Box 380732  
East Hartford, CT 06138 - 0732

## Create a Copy

We would like to see as many people as possible try a Free Evaluation Copy of LifeTime. To that end, we make it easy for you to make a complete copy on a diskette to give to someone who has become interested. Included on the copy will be all files that you received to let you install LifeTime on your own machine. Since we do not want any copies distributed without each of these files, the copy will not be performed if any are detected as missing. Of course, none of the items, notes, phone information, or other data that you have entered into your copy of LifeTime will be copied in this process.

All that is required to create a copy is a formatted, blank diskette of at least 1.4 Meg capacity (that would be a double-sided, high density 3.5" diskette). All that space is not needed for the copy, but the next size capacity down, 750 K, is too small.

### Instructions

- Choose the "Create a Copy" pick from the "File" menu.
- Type in the drive letter where you want the copy to go, and hit Enter. Any path information you put in will be ignored - the copy will be written to the root directory.
- Insert the diskette into the specified drive.
- The copying of the files will then take place, taking several minutes.
- Let the person receiving the copy know they should execute the SETUP.EXE file on the diskette to install LifeTime on their own machine.

## License and Disclaimer

This license entitles any user to examine and make personal use of an Evaluation copy of LifeTime for a period of 21 days. To continue using LifeTime beyond this 21 day period, a registration fee must be paid to Amber Timbre Software or its agent. Use of LifeTime beyond this 21 day period without registration is illegal.

Users of a registered or Evaluation copy of LifeTime are free to make copies of it so that other users can examine it for the evaluation period of 21 days, as long as such a copy contains all of the files that are copied as a result of choosing the "Create a Copy..." pick from the File menu of LifeTime.

Under no circumstances may a copy of the "LIFETIME.KEY" file that is present with a registered copy of LifeTime be distributed to any other person. A registered user may copy the "LIFETIME.KEY" file and all other LifeTime files as part of his own personal data backup procedures, or for his own personal use of LifeTime on different computers.

AMBER TIMBRE SOFTWARE DISCLAIMS ALL WARRANTIES RELATING TO THIS SOFTWARE, WHETHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, AND ALL SUCH WARRANTIES ARE EXPRESSLY AND SPECIFICALLY DISCLAIMED.

NEITHER AMBER TIMBRE SOFTWARE NOR ANYONE ELSE WHO HAS BEEN INVOLVED IN THE CREATION, PRODUCTION OR DELIVERY OF THIS SOFTWARE SHALL BE LIABLE FOR ANY INDIRECT, CONSEQUENTIAL, OR INCIDENTAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH SOFTWARE EVEN IF AMBER TIMBRE SOFTWARE HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR CLAIMS.

IN NO EVENT SHALL AMBER TIMBRE SOFTWARE'S LIABILITY FOR ANY DAMAGES EVER EXCEED THE PRICE PAID FOR THE LICENSE TO USE THE SOFTWARE, REGARDLESS OF THE FORM OF CLAIM. THE PERSON USING THE SOFTWARE BEARS ALL RISKS AS TO THE QUALITY AND PERFORMANCE OF THE SOFTWARE.

Some states do not allow the exclusion of the limit of liability for consequential or incidental damages, so the above limitation may not apply to you.

This agreement shall be governed by the laws of the State of Connecticut and shall inure to the benefit of Amber Timbre Software and any successors, administrators, heirs and assigns. Any action or proceeding brought by either party against the other arising out of or related to this agreement shall be brought only in a STATE or FEDERAL COURT of competent jurisdiction located in Hartford County, Connecticut. The parties hereby consent to in personam jurisdiction of said courts.

By registering your copy of LifeTime, you are agreeing to the terms and conditions of the above Amber Timbre Software license agreement.

## The Schedule Display

This is where you can look at, edit, or add new Schedule items to any given day. You must be on the Full Screen or Items Only presentations of the LifeTime main screen to see this display.

### Getting to the Schedule Display from the To-Do Display

- Hit Ctrl + S  
or
- Click on the "Sched" index tab in the upper right.  
or
- Double-click on a blank part of the viewport.

### Features of the Schedule Display

- If there are items higher than the top edge of the viewport, or lower than the bottom edge, the corresponding lights at the ends of the scrollbar will be on.
- You can set the time corresponding to the top edge of the viewport (that is, what will be there on program start-up) to be a time of your choosing. The default time is 7:00 A.M.
- When you are looking at the schedule for today's items, the day-of-the-week heading at the top of the screen will have red letters, by default. Also, there will be a small red Time Indicator at the appropriate current time position along the left side of the viewport.
- You can set the AutoScroll feature on so that your displayed Schedule items will slowly move up on the screen to keep pace with the passage of time.
- You may vary the Magnification at which the items are displayed. A higher magnification allows for smaller time increments to be used.
- The left and right arrow buttons at the screen's bottom allow you to go backward or forward one day in the Schedule display. Hitting F4 or F3 will also go forward and back a day.

## The To-Do Display

This is where you can look at, edit, or add new Schedule items to any given day. You must be on the "Full Screen" or "Items Only" presentations of the LifeTime main screen to see this display.

### Getting to the To-Do Display from the Schedule Display

- Hit Ctrl + T  
or
- Click on the "ToDo" index tab in the upper right  
or
- Double-click on a blank part of the viewport.

### Features of the To-Do Display

- If there are items higher than the top edge of the viewport, or lower than the bottom edge, the corresponding lights at the ends of the scrollbar will be on.
- When you are looking at the list of today's items, the day-of-the-week heading at the top of the screen will have red letters, by default.
- The left and right arrow buttons at the screen's bottom allow you to go backward or forward one day in the To-Do display.

See Also

[The Schedule Display](#)

[Day Title](#)

[Items](#)

[Presentation Style](#)

[Display Defaults](#)

[Priority](#)

## **Day Title**

You may assign a title to give a general characterization to any given day. Examples would be "SALES SEMINAR" or "VACATION". The Day Title displays in the Hold area.

### **Mouse/Keyboard Method**

- Choose the Day Title pick from the "Options Menu"  
or  
Double-click on the Hold Area.
- Type in your choice of Day Title, or revise the title that is already there.
- Hit Enter.

## Items

An item is an entry in the scrollable viewport of LifeTime's main screen, representing a Schedule appointment or a To-Do task.

### How to

[Create an Item](#)

[Change the Text of an Item](#)

[Copy an Item](#)

[Move an Item](#)

[Delete an Item](#)

### General item properties

[Complete](#)

[Notes](#)

[Link](#)

[Recur](#)

### Schedule item properties

[Start Time](#)

[Duration](#)

[Alarm](#)

### To-Do item properties

[Due Date](#)

[Priority](#)

## Creating an Item

An item can be entered any time the main LifeTime screen is showing without any sub-screens on top of it. Just type in the text of your item (it will show in the text box above the viewport), and hit Enter.

- If the To-Do items are showing, your new item will appear below all the other To-Do items.
- If the Schedule items are showing, the new item will appear in the Hold area. From here you can drag it with the mouse or move it with the keyboard to its proper start time.

See Also

[Copying an Item](#)

[Moving an Item](#)

[Setting the Start Time](#)

## Copying an Item

You may make a copy of any item to place on another day, or even to move a copy between the Schedule and the To-Do list. Only the text of an item is copied, not its properties, with the exception that the duration of a Schedule item will be included in a copy of one.

### Mouse Method

- Choose "Copy" from the Popup Menu. A copy of the item appears in the Hold area.  
or  
• Drag the item to the Hold area, making sure to press and hold the Ctrl key before dropping the item there.
- Set the day and viewport where you want the copy to go.
- Drag the item from the Hold area to its new location, and drop it.

See Also

### [Popup Menu](#)

### Keyboard Method

- Highlight the item you want to copy.
- While holding down the Ctrl key, hit the Enter key. The item's copy will appear in the Hold area.
- Set the day and viewport where you want the copy to go.
- Hit the Down-Arrow to highlight the new item.
- While holding down the Alt or Ctrl key, hit the Down-arrow key to bring the new item into the viewport.
- Continue hitting Alt or Ctrl and the Down or Up-arrow key to place the item to its correct time.

See Also

### [Moving an Item](#)

## **The Popup Menu**

This "floating" menu allows you to quickly access the functions and properties associated with any individual item. Its picks correspond exactly to the picks under the "Items" choice of the "Options" menu.

### **Accessing the Popup Menu**

The Popup Menu can be accessed only by clicking on an item with the right mouse button. After it appears, you click on one of the choices with the left mouse button.

See Also

[The Options Menu](#)

[Items](#)

## **The Options Menu**

This contains functions related to the display of LifeTime's main screen, and the manipulation of items in the viewport.

### **Day Title**

Allows you to assign an overall title to a day.

### **Settings**

These picks give access to the various default settings, which include: setting the time or date, choosing display defaults, defining your print parameters, defining your autodial parameters, setting the display of your name in the title bar, and choosing which path to point to for data.

### **Item**

Allows you to set properties for the item you have selected. These include: an alarm (for Schedule items), the Complete property, the due date and priority (To-Do items), a link to a phone entry, access to an attached note, and item recurrence. There are also functions to manipulate the item here: copy, delete, and move.

### **Calendar**

The Calendar can be advanced forward and backward with the sub-picks to this choice.

### **Day Displayed**

The day of the Schedule/To-Do viewport can be adjusted forward and backward with the picks here.

### **Presentation**

This has picks to control the LifeTime main screen display size: full size, view of the viewport items only, or view of the Calendar only.

### **Zoom**

The picks under this choice allow you to adjust the magnification of the Schedule viewport.

### **Views**

Here you can choose to see the Week View or Month View Windows.

### **Phone Book**

This pick brings up the Phone List showing all names in your Phone Book.

**Alarms Enabled/Alarms Disabled**

You can toggle between activating the all alarms and deactivating them with these picks.

**Schedule/To-Do**

These control which of the two item lists appears in the viewport.

## **Moving an Item**

An item may be moved either to a different position on the viewport, or it may be moved to a different day. It may also be moved between the Schedule and To-Do list.

### **How To**

[Move an Item within its Viewport](#)

[Move an Item to a new Day or Viewport](#)

## Moving an Item within its Viewport

The effects of a move differ somewhat between a To-Do and a Schedule item. In the Schedule view, the item is simply moved to a new time. For a To-Do, the item will be moved above the item in the list it is dropped on. If you have the To-Do items sorted by Priority, an item cannot be moved outside of its own Priority group.

### Mouse Method

- Drag the item to a new position on the screen, and drop it.

### Keyboard method

- Highlight the item you want to move.
- Holding the Alt key down, press the Up or Down-arrow key until the item is at the position on the screen where you want to release it.
- Hit Enter.

See Also

[Setting the Start Time](#)

[Display Defaults](#)

## Setting the Start Time

### Mouse Method

- Drag the Schedule item in the viewport with the mouse, and drop it when its top edge lines up with the desired time increment on the left side of the viewport. The exact time you are dropping it on will be displayed on the left side of the Hold area.
- For finer control over the start time you set when dragging with the mouse, use Magnification 4, or set Snap-To off.

### Keyboard Method

- Highlight the Schedule item.
- Hit the Ctrl + Up or Down arrow key (large increments), or the Alt + Up or Down-arrow key (small increments) until the item's top edge lines up with the desired time increment on the left side of the viewport. Then hit Enter. The exact time you are dropping it on will be displayed on the left side of the Hold area.
- For finer control over the start time you set with the keyboard, use Magnification 4.

See Also

[Display Defaults](#)

[Zoom](#)

[Snap-To](#)

## Display Defaults

These defaults apply to the display of Schedule and To-Do items in the viewport. This window is accessed from the "Display" pick of the "Settings" choice of the "Options" Menu.

- Time and Zoom - Set the time that will be at the top of your Schedule viewport when you start up LifeTime every day. You can also set the magnification, or Zoom level, that will show at start-up.
- Time Display - Choose a 24-hour or 12-hour format.
- Startup Display - You can have either the Schedule items or the To-Do items display first on startup.
- Alarm Sound - Set the Duration and Pitch of the Schedule Alarm function. Alternatively, choose a WAV file you would like to use for the alarm sound. You may choose from any WAV file you have stored in your WINDOWS directory.
- AutoScroll - Turn this function on to make your Schedule items automatically scroll up during the day. Hit "A" to toggle this.
- Snap-To - Set this to make schedule items that you drop into the viewport snap exactly to the nearest time increment. Hit "S" to toggle this.
- Priority Sort - With this set on, your To-Do items will always be sorted by highest to lowest priority. Hit "P" to toggle this.

See Also

[Snap-To](#)

## Snap-To

The Snap-To setting in the Display Defaults window gives you the ability to quickly set the start-time and duration of Schedule items to standard default increments, or to gain a greater precision over these settings.

### Snap-To features

- Snap-To has no effect over keyboard manipulation of schedule items, only over mouse manipulation.
- Snap-To controls increments in magnifications 1 and 2, but has no effect in magnification 4.
- With Snap-To on, start-time and duration increments correspond with the visible time lines to the left of the Schedule viewport. This means 30 minute increments in magnification 1, 15 minutes in magnification 2.
- With Snap-To off, the start-time and duration can be modified in 5 minute increments in magnifications 1 and 2.

### How to set Snap-to

- Choose "Options", then "Settings", then "Display" from the LifeTime menu to bring up the Display defaults window.
- Snap-To may be toggled on or off by clicking on the appropriate choice with the mouse, or by hitting "S" in the keyboard.

See Also

[Display Defaults](#)

[Setting the Start time](#)

[Setting the Duration](#)

[Relating Magnification to Duration](#)

## Setting the Duration

### Mouse Method

- Place the mouse cursor inside the borders of the Schedule item whose duration you want to adjust.
- Press down and hold the right mouse button.
- Slowly move the mouse downward or upward while holding the button. The duration will increase or decrease one increment, depending on the direction of the mouse movement.
- The item's exact duration at any given time will be displayed on the right side of the Hold area.
- Continue until the duration is at the desired length, then release the right mouse button.
- For finer increments of duration adjustment with the mouse, set Snap-To off or use Magnification 4

### Keyboard Method

- Highlight the Schedule item whose duration you want to adjust.
- Hit Alt + "+" key (small increments) or Ctrl + "+" key (large increments) to increase the duration. Hit Alt or Ctrl + "-" key to decrease it.
- The item's exact duration at any given time will be displayed on the right side of the Hold area
- Continue until the duration is at the desired length, then Hit Enter.
- For finest control over Schedule item duration, use Magnification 4.

[Zoom](#)

[Relating Magnification to Duration](#)

[Snap-To](#)

## Zoom

This unique feature allows you to vary the apparent size of the items in your Schedule Display. When you raise the magnification, it means that the duration of your appointments can be adjusted in smaller increments than the half-hour of Magnification 1. The start time increments are also calibrated in smaller lengths at higher magnifications. Note, however, that at higher magnifications, the viewport displays a smaller portion of the day.

- Vary the Zoom by hitting Ctrl + I or Ctrl + O to Zoom In or Out.

See Also

[Relating Magnification to Duration](#)

## Relating Magnification to Duration

The magnification you have set on the Schedule viewport will determine the amount of time in each increment of duration change. Here are the increments and defaults that correspond to each magnification:

### **Magnification 4**

The amount of each duration increment change is 1 minute. The Snap-To setting has no effect in magnification 4. The minimum duration for any item is 5 minutes.

### **Magnification 2**

The amount of each duration increment change is 30 minutes with "Snap-To" on, and 5 minutes with "Snap-To" off. In this magnification the duration cannot be set to less than 15 minutes. If, in a higher magnification, an item's duration is set to less than 15 minutes, the item will be represented in magnification 2 by a box without a border.

### **Magnification 1**

The amount of each duration increment change is 30 minutes with "Snap-To" on, and 5 minutes with "Snap-To" off. In this magnification the duration cannot be set to less than 30 minutes. If, in a higher magnification, an item's duration is set to less than 30 minutes, the item will be represented in magnification 1 by a box without a border.

## Moving an Item to a new Day or Viewport

Moving the item to a new viewport means moving it from the Schedule to the To-Do list or vice-versa.

### Mouse Method

- Drag the item to the Hold area, or choose "Move" from the Popup Menu.
- Change to the new day or viewport where you want the item to go.
- Drag the item from the Hold area to its new location.

### Keyboard Method

- Highlight the item you want to move.
- While holding down the Ctrl key, hit the Up-arrow key until the item moves into the Hold area.
- Change to the new day or viewport where you want the item to go.
- Hit the Down-Arrow key to highlight the item in the Hold area.
- While holding down the Alt or Ctrl key, hit the Down-arrow key to bring the new item into the viewport.
- Continue holding Alt or Ctrl and hitting the Down or Up-arrow key to place the item in the position where you want it.

## Changing the Text of an Item

The text of any item can be revised.

- Highlight the item.
- Edit the item text in the box just above the Hold area.
- Hit Enter.

## Deleting an Item

When you delete an item you will also be deleting any note that is attached to it. The exception to this is when you delete a recurring item with an attached note, in which case the note is deleted only if you are also deleting all occurrences of the recurring item.

### Mouse Method

- Drag the item to the trash can icon in the lower left of the screen.  
or  
Choose "Delete" from the Popup Menu.

### Keyboard Method

- Highlight the item.
- Hold the Shift key down and hit the Delete key.

## Notes

You can add a note of up to 32,000 characters to any To-Do or Schedule item. You can also add a note that is attached to a particular day, instead of to a particular item.

### How To

[Access the Notes Window](#)

[Edit a Note](#)

[Print a Note](#)

## Accessing the Notes Window

The context in which you bring up the Notes Window determines what the note will be attached to.

### Mouse Method

- For a note that will be attached to a To-Do or Schedule item, double-click on the item to which you want to attach the note.  
or  
Choose "Note" from the Popup Menu.
- For a note you want to attach to a particular day, click on the "Daily Note" button on the upper right, when you have the desired day displayed in the viewport.

### Keyboard Method

- For a note that will be attached to a To-Do or Schedule item, Highlight the item.
- Hit Ctrl + N.
- For a note you want to attach to a particular day, hit Alt + D after you have the desired day displayed in the viewport.

See Also

[Popup Menu](#)

## **Editing a Note**

As soon as a Notes Window comes up, you can begin typing text into it. Alternatively, you can Import a text file into the Notes Window. You can also Cut/Copy/Paste text into or out of a Note Window. If you wish to undo your editing before you save the note, pick the "Undo" option from the "Edit" menu.

To save the note, click on the "Ok" button or select "Save" from the "File" Menu. After a note is created, the text of the item it is attached to becomes displayed in italics. For a note attached to a particular day, the text of the "Daily Note" button appears in italics whenever that day is the currently displayed day on the Schedule.

### **How To**

[Import a Note File](#)

[Change the Notes Window Font](#)

## Importing a Note File

You may Import an ASCII text file into a Notes Window.

### Mouse/Keyboard Method

- Choose "Import" from the Notes Window "File Menu".
- Choose the desired text file using the dialog box that comes up.

See Also

[Printing a Note to a File](#)

## Printing a Note to a File

You can output any note as an ASCII text file. Then you can import it into other applications.

### Mouse/Keyboard Method

- With the Note's Window displayed, choose "Print to File" from the File Menu.  
or  
Hit Ctrl + F.
- A dialog box will come up where you can specify the name you want this file to have. You can also change the directory and/or drive to which it will be written.

## Changing the Notes Window Font

You can use any font available on your system to display the text in a Notes Window. Once you set it for one Notes Window, the same font information will also apply to the display of any other note. If you will be printing the note from the Notes Window, it is highly recommended that you use a TrueType font.

### Mouse/Keyboard Method

- Choose "Fonts" from the "Edit" Menu of the Notes Window.
- In the dialog box that comes up, you can specify the font you want, its size, and other display properties.
- The font you choose is not saved unless you save the note or click "Ok" on the Notes Window.

## Printing a Note

You can print a note at any time you have its window displayed. You can also print notes as part of the Schedule/To-Do print function. If you wish, the note's text can go to a file instead of to paper.

### Mouse/Keyboard Method

- With the Note's Window displayed, choose "Print" from the "File" pick on the Menu.  
or  
Hit Ctrl + P.

### How To

[Print a Note to a File](#)

[Print Daily Items](#)

[Control your Print](#)

## Printing Daily Items

You may print the Daily items, according to your Print Options in the Print Setup Window, for any given day. You may also print the items for an entire week or an entire month. And, with Select-Dial, you can print other blocks of days that don't fit into one of the above choices.

### Mouse Method

- Print a Day - Drag any day on the calendar to the Print icon underneath the Calendar, and drop it.
- Print a Month - Drag the Month name from the Calendar to the Print icon underneath the Calendar, and drop it.

### Keyboard Method

- Print a Day - Set the Schedule display to the day you want to print, then choose "This Day" from the "Print" pick of the "File" Menu.
- Print a Week - Set the Schedule display to any day (Sunday through Saturday) during the week you want to print, and choose "This Week" from the "Print" pick of the "File" Menu.
- Print a Month - Set the Schedule display to any day during the month you want to print, and choose "This Month" from the "Print" pick of the "File" Menu.

[Print Control](#)

## Select-Print

Sometimes you will want to print a block of days that does not fall neatly into a week, or you may want to print some days that are scattered over a month. Select-Print allows you to select the days you want printed, and then to print them.

### Mouse Method

- For a block of contiguous days, drag the first day you want printed to the last day, and drop it.
- For single days, click on the day, but hold the mouse down for a longer period than a true 'click'. What you must do, in effect, is to drag-and-drop the day on itself.
- You may unselect a day or range of days by repeating the process above.
- Selected days are identified by a yellow background color.
- All selected days must be in a single calendar month.
- To print the selected days, drag any one of them to the Print icon below the Calendar, and drop it.

[Printing Daily Items](#)

[Print Control](#)

## Print Control

Anytime you invoke the Print function for Schedule, Notes, or Phone information, you are brought to the Print Control window. Here you can set parameters concerning the print formatting, including what printer to send it to.

### Header

- Type in information that will appear at the top of each printed page.

### Font

- Click the Fonts button to get into the Fonts [Dialog box](#).
- You may choose a font name and font size, and whether it is "Regular", "Italic", or "Bold" style.
- It is highly recommended that you use a TrueType font for best results.

### Page Size

- Choose the appropriate page size you would like for your prints. You may choose one of the pushbutton pre-defined sizes, or set your own customized page size, in inches or centimeters.

### Calendar Print Options

- When printing Calendar data, choose whether to include Schedule, To-Do and Notes data.

### Phone Book Print Options

- When printing out of the Phone book, specify how much of the information in each entry you want printed.

### Preview

- This button allows you to see on-screen what your print will look like before you send it to the printer.

### Printer

- Set the destination printer with this button. The name of the chosen printer will appear underneath.

[Printing](#)

## Printing

LifeTime allows you to do three types of printing of your stored information. One is the print of your daily Schedule/To-Do items (with their attached notes, if you wish); another is the print of individual notes from the Notes Window; the third is the print of your Phone List.

### How To

[Control a Print](#)

[Print Daily Items](#)

[Select-Print](#)

[Print a Note](#)

[Print the Phone List](#)

## Printing the Phone List

You may print out the contents of your Phone List from the Phone List Window.

### General Information

- You may choose to print out the names and numbers alone, or include the addresses, or also include the text in the "Descriptive" and "Log" boxes of the Phone Entries.
- The print's page size, font, and font size will be as specified on the Print Control window.

### Producing the Print

- Choose Print from the "File" menu of the Phone List Window. This brings up the Print Control window.
- Choose the radio button for a print with name and numbers only; or name, numbers, and addresses; or all Phone Entry information.
- Check the box below the radio buttons if you want to print out only the Phone List entry that is currently highlighted.
- Click the "Print" button. You may preview your print first by clicking the "Preview" button.

## **Recur**

With Recur you may make a Schedule or To-Do item repeat at a regular interval, such as every week or every month.

### **How To**

[Create a Recur](#)

[Delete a Recur](#)

## Creating a Recur

A Recur starts out as an item like any other. You can then convert it to a Recur.

### Mouse Method

- Choose "Recur" from the Popup Menu of the item you want to turn into a Recur. The Recur Window will appear.
- Select a Frequency from the dropdown list box. This specifies how often the recurring item will repeat.
- Click the date on the Calendar when you want the item to stop recurring. Or, you can make it recur indefinitely into the future by checking the "Continue Indefinitely" radio button.
- If this is a Schedule item, you may set or revise the Alarm by clicking the Set Alarm button. If a To-Do, you may set or revise the Priority by clicking the Set Priority button.

### Keyboard Method

- Highlight the item you want to turn into a Recur. Choose "Items" then "Recur" from the "Options" pick of the LifeTime Menu. The Recur Window will appear.
- Select a Frequency from the dropdown list box. This specifies how often the recurring item will repeat.
- Type in the date when you want the item to stop recurring. Or, you can make it recur indefinitely into the future by checking the "Continue Indefinitely" radio button.
- If this is a Schedule item, you may set or revise the Alarm by hitting Alt + A. If a To-Do, you may set or revise the Priority by hitting Alt + P.

[Creating a Link from the Phone List](#)

[Popup Menu](#)

## **Creating a Link from the Phone Entry**

From the Phone Entry you can cause a To-Do item to be created which will remind you to contact the person on one of the entries. The ToDo item will be linked back to the entry.

### **Mouse Method**

- If you want a particular phone number to be on the linked To-Do item, click on the phone number.
- Click on the box that says "Contact again on" if the light next to it is not already on.
- Click on the date on the Calendar where you want the linked To-Do to be placed.
- Click on the "Ok" button.

### **Keyboard Method**

- If you want a particular phone number to be on the linked To-Do item, tab to it.
- Hit Ctrl + A to toggle the "Contact again on" light on, if it is not already.
- Toggle to the date field and type in the date where you want the linked To-Do placed.
- Hit Alt + O.

## Creating a Link from the Phone List

From the Phone List window you can use your mouse to create a Schedule or To-Do item from any entry in the list.

### Method

- Click on an entry in the Phone List, bringing up its associated phone numbers.
- If you want a particular phone number to be on the linked To-Do item, click on the phone number.
- Make sure part of the Hold Area is visible on the main screen, moving the Phone List window if necessary.
- Drag-and-drop the name from the list onto the Hold Area. This creates a new linked item.
- Bring the viewport to the day when you want the reminder, then drag-and-drop the item onto the Schedule or To-Do list.

## Severing a Link

If the link on an item no longer seems relevant, you can sever it.

### Mouse Method

- Choose Link from the Popup Menu of the linked item. The Phone Entry Window will appear showing the linked entry.
- Click on the "UnLink" button.

### Keyboard Method

- Highlight the item whose link you want to sever.
- Hit Ctrl + L. The Phone Entry Window will appear showing the linked entry.
- Hit Alt + L.

See Also

[Popup Menu](#)

## Using a Link

At the time you need the phone number or other information contained on the Phone Entry, use the link to immediately see it.

### Mouse Method

- Choose "Link" from the Popup Menu of the item whose link you are using. The Phone Entry with the linked information will appear.
- Click on the Cancel button when you no longer need to view the information.

### Keyboard Method

- Highlight the item whose link you want to use.
- Hit Ctrl + L. The Phone Entry Window will appear showing the linked entry.
- Hit Alt + C when you no longer need to view the information

## **Start Time**

The start time for a Schedule item is set when you first place it on the viewport. It can be changed at any time after that.

### **How To**

[Set the Start Time](#)

## Duration

The duration of a Schedule item corresponds to the height of the box representing it on the viewport.

### How To

[Set the Duration](#)

[Relate Magnification to Duration](#)

## Alarm

An alarm may be set on any Schedule item. Setting an alarm includes setting how long before the appointment it should go off. The alarm will continue to sound until one minute after the appointment start time, unless it is turned off.

### How To

[Set an Alarm](#)

[Turn Off an Alarm](#)

[Disable/Enable All Alarms](#)

See Also

[Display Defaults](#)

## Turning Off an Alarm

An alarm may be turned off before it begins sounding, or after it has begun sounding. After the alarm has begun sounding, an Alarm Notification window will pop up indicating that an alarm has gone off, and giving its description. It will ask if you want to turn the alarm off, and will remain visible until you answer Yes or No. You also have a "Snooze" option for the alarm. The following methods can turn off an alarm at any time.

### Mouse Method

- Choose "Alarm" from the Popup Menu of the Schedule item whose alarm you want to unset. The Alarm Window will appear.
- Click on the "UnSet Alarm" radio button.
- Click on the "Ok" button

### Keyboard Method

- Highlight the Schedule item whose alarm you want to unset.
- Hit Ctrl + A. The Alarm Window will appear.
- Hit Ctrl + U to check the "UnSet Alarm" radio button.
- Hit Enter.

### Note

- To stop an alarm when it has begun sounding, you may also hit Ctrl + Alt + A.

### "Snooze" Feature

When the Alarm Notification window pops up after an alarm has started to go off, one of the choices on the window is "Snooze". The effect of clicking on this button is to silence the alarm, and reset it to go off again at approximately half of its current lead time. When the actual start time of the appointment is reached, clicking the "Snooze" button will have no effect.

See Also

[Popup Menu](#)

## **Disable/Enable all Alarms**

You can prevent any alarms from going off when their set times are reached. You can remove this setting, and the alarms will go off as scheduled.

### **Mouse/Keyboard Method**

- Choose "Alarms Disabled" from the LifeTime "Options" Menu, to disable all alarms. The Alarms Disabled icon will appear to the right of the Calendar.
- Choose "Alarms Enabled" from the LifeTime "Options" Menu, to re-enable all alarms. The Alarms Disabled icon to the right of the Calendar will disappear.

### How To

[Set a Due Date](#)

[UnSet a Due Date](#)

## Setting a Due Date

### Mouse Method

- Choose "Due Date" from the Popup Menu of the To-Do item on which you want to set a due date.  
or
- Click on the far left side of the item with the left mouse button.
- The Due Date Window appears.
- Click the date on the Calendar that you want to be the due date.
- Click the "Ok" button.

### Keyboard Method

- Highlight the To-Do item for which you want to set a due date.
- Hit Ctrl + U to bring up the Due Date Window.
- Type in the date that you want to be the due date.
- Hit Enter.

See Also

[Popup Menu](#)

## UnSetting a Due Date

You can unset any existing due date on a To-Do item.

### Mouse Method

- Choose "Due Date" from the Popup Menu of the To-Do item whose due date you want to change.  
or
- Click on the far-left part of the To-Do item with the left mouse button.
- The Due Date Window appears.
- Click on the "UnSet" button.

### Keyboard Method

- Highlight the To-Do item whose due date you want to unset.
- Hit Ctrl + U. The Due Date Window appears.
- Hit Alt + U.

See Also

[Popup Menu](#)

## Priority

[Display Defaults](#)

## Presentation Style

The LifeTime main screen has three different "styles" in which you can display it.

### Full-Screen

This is the display presentation that comes up when you start up LifeTime.

- Access the Full Screen Presentation from one of the others by hitting Ctrl + F3, or, if you are in the Calendar Presentation view, clicking on any calendar day will bring up that day in the Full Screen view.

### Items Only

This display truncates off the Calendar from the display, so you in effect see only the viewport, and its controls.

- Access the Items Only Presentation from one of the others by hitting Ctrl + F2.

### Calendar

This display shows only the Calendar and the icons underneath it.

- Access the Calendar Presentation from one of the others by hitting Ctrl + F1, or, if you are in the Full Screen Presentation view, by clicking on the Month Name above the Calendar.

# The Calendar

## General Information

- Clicking on a day on the calendar with the left mouse button will cause that day's items to be displayed in the [viewport](#).
- Any days that have Schedule items on them will appear by default in blue on the Calendar, except for the current day, which is always red.
- The [Julian day](#), and the number of days left in the year appear in the lower right of the Calendar page. These numbers are for whatever day is currently displayed in the viewport.
- The coloring of the Month and Year in the Calendar's title indicates whether this Month/Year is in the past, the future, or is the current Month/Year.
- The buttons under the Calendar with the single arrow to the left and right will move the Calendar forward or back one month. The day displayed in the viewport is unchanged by this. The same results can be obtained by hitting the F6 and F5 keys.
- The buttons under the Calendar with the double arrows to the left and right will move the Calendar forward or back one year. The day displayed in the viewport is unchanged by this. The same results can be obtained by hitting the F8 and F7 keys.
- The button under the Calendar with today's date will return both the calendar and the viewport to the current day/month/year. Hitting F12 will do the same thing.

[Popup Schedule](#)

## The Popup Schedule

The Popup Schedule allows you to see a list of the Schedule and To-Do items for any day, in a popup window. The advantage of the Popup Schedule is that you can view these other days' items without having to change the day that is displayed in the [viewport](#).

### Mouse Method

- Click on any day on the Calendar with the right mouse button.  
or
- Click on any day on the Month View with the right mouse button.  
or
- Click on any day on the Week View with the right mouse button.
- Click anywhere on the screen to make the Popup Schedule disappear.

### Keyboard Method

- While holding down the Alt key, type in the number of the day in the currently-displayed Calendar month whose Popup Schedule you want to see.
- Press any key to make the Popup Schedule disappear.

See Also

[Month View](#)

[Week View](#)

## Month View

From the LifeTime main screen, you can at any time see the schedule/To-Do list for any month, independent of what day is displayed in the viewport.

### Mouse Method

- Drag and drop the month name from above the Calendar to the Month View icon below and to the right of the Calendar. The Month View for that month appears.
- Clicking on any day in the Month View, to select it, allows you to page up and down in that day's schedule.
- Double-clicking on any day in the Month View causes the LifeTime main screen viewport to display that day's items.
- Clicking with the right mouse button on any day in the Month View brings up the Popup Schedule for that day.
- Clicking on the buttons on the bottom with left and right arrows shifts the Month View forward or back one month.

### Keyboard Method

- To see the Month View for the month currently displayed on the Calendar, hit Ctrl + M.
- You may tab to any day in the month, and page up or down in its schedule.
- Hitting Alt + F and Alt + B takes you forward a month or backward a month, respectively.

See Also

[The Popup Schedule](#)

## **Week View**

From the LifeTime main screen, you can at any time see the schedule/To-Do list for any week, independent of what day is displayed in the viewport.

### **Mouse Method**

- Drag and drop the day from which you want the Week View to begin, to the Week View icon below and to the left of the Calendar. The Week View for that week appears.
- Clicking on any day in the Week View, to select it, allows you to page up and down in that day's schedule.
- Double-clicking on any day in the Week View causes the LifeTime main screen viewport to display that day's items.
- Clicking with the right mouse button on any day in the Week View brings up the Popup Schedule for that day.
- Clicking on the buttons on the bottom with left and right arrows shifts the Week View forward or back one week.

### **Keyboard Method**

- To see the Week View for the week starting with the currently displayed day, hit Ctrl + W.
- You may tab to any day in the week, and page up or down in its schedule.
- Hitting Alt + F and Alt + B takes you forward a month or backward a month, respectively.

You can select a Phone List member to get to the detailed Phone Entry Window for that member.

### Mouse Method

- Double-click on the member you want detailed information on. The Phone Entry Window for that member will appear.

### Keyboard Method

- When you are browsing the name you want detailed information on, hit Alt + S to select it and bring up the Phone Entry Window for that member.

## The Phone Entry

This is where you can enter and view all the detailed information about the people on your phone list.

### Phone Entry Features

- You may enter up to four telephone numbers for an entry. The descriptive labels to the left of the numbers are all editable.
- Each entry contains a Descriptive note area, for you to keep information you want to remember about this person, and a Log area, for you to record notes about your contacts with him.
- LifeTime's exclusive Select-Dial lets you choose what part of the phone number to dial.
- The Access window lets you integrate the use of carrier access and credit card numbers with your Autodialing.
- You can set a date for when to next contact this person, and a linked To-Do item reminding you about it will be automatically created for that date.

[Create a Link from the Phone Entry](#)

## Creating a Phone Entry

### Mouse/Keyboard Method

- To create a new phone entry, you come to the Phone Entry Window from the Phone List Window. Click on the "New" button, or hit Alt + "N" while on the Phone List.
- Fill out the fields you need to on the Phone Entry Window.
- Click "Ok" or hit Alt + O to return to the Phone List. Or, if you want to enter another new entry, click on the "Clone" or "New" button, or hit Alt + C or Alt + N.

See Also

## Cloning a Phone Entry

When you clone a phone entry, you are adding a new name to the phone book, but instead of starting out with all blank screen fields to fill in, all the information from the entry you are cloning from is still on the screen, except the Name fields and the Title.

### Mouse/Keyboard Method

- Make the Phone Entry Window display the entry you want to clone, either through browsing through the Phone Entries, or choosing a member on the Phone List.
- Click on the "Clone" button, or hit Alt + L.
- Fill in the Name fields, and the Title field. You may also change any of the the prefilled information.
- Click on the "Ok" button or hit Alt + O.

## AutoDialing from the Phone Entry

If you have a modem on your computer, you may autodial any number on a Phone Entry. You must first have set up the autodial parameters in the AutoDial Setup Window. If your phone usage requires dialing a long-distance prefix or suffix, or a credit card number, use the "Access" menu pick.

### Using the Prefix

- Under the label "Dial Prefix?", click on the word "Yes" if you want to use the Prefix, or on "No" if you do not.
- Hit Ctrl + P to toggle between "Yes" and "No".
- If you click "Yes" you may edit the prefix in its text box. Choosing "Yes" means the prefix will be dialed before the number you choose for autodial.

### AutoDialing

- Drag the phone number you want to the Phone icon underneath the list of phone numbers, and drop it there.  
or
- Tab to the phone number you want to use, and hit Alt + I.

[Long-Distance Access](#)

## AutoDial

Autodial allows you to dial any phone number you have stored in LifeTime's Phone Book, if you have a modem attached to your computer.

### AutoDial Features

- You specify the COM port your modem is attached to, and other information, in the AutoDial Setup Window. This must be filled out before you can use AutoDial.
- The Prefix is something you would use if your company has a code that is dialed to get an outside line. It can be filled in on the AutoDial Setup Window, but you can choose whether to use it, and even change it, at the time you are autodialing from one of the Phone Windows.
- Long-distance access codes and credit card numbers can be integrated with normal Autodialing.

[Long-Distance Access](#)

## AutoDial Setup

The parameters on this window are for controlling the functioning of the AutoDial feature of the Phone Book. The Window is accessed by choosing "AutoDial" from the "Settings" pick of the "Options" Menu.

- Dialing Prefix - This number will be dialed in front of any number in your Phone Book that you AutoDial.
- Port - You must specify which of the COM ports your modem is connected to.
- Select-Dial - Turn this dialing aid on or off.
- Dial Type - Specify if your phone uses Tone or Pulse Dialing.

See Also

[Select-Dial](#)

## Select-Dial

Select-Dial is a unique feature that you can use from the Phone Entry Window or the Phone List Window. It allows you to "select off" a part of the phone number that you do not want to dial when you use autodial.

### Why you might need Select-Dial

You will want to store any long-distance number with (1-) and its area code. But when you travel to that location, and the number converts to a local call, you will not want to dial the long-distance information. With the Select-Dial option turned on, you can autodial only the local part of the number.

### Mouse Method

- Be sure Select-Dial is turned on in the AutoDial Setup Window.
- When you are ready to drag the phone number for the autodial, place the cursor at the end of the long-distance information, and press the left mouse button.
- Drag the cursor straight to the left, moving outside the left edge of the phone number's box, still holding down the left mouse button. All the long-distance information will be "selected", and you will be in the act of dragging the rest of the phone number.
- Continue dragging the phone number down to the Phone icon. The number displaying just above the Phone icon shows the portion of your phone number that will actually be dialed.
- Drop the phone number on the Phone icon.

### Keyboard Method

- Be sure Select-Dial is turned on in the AutoDial Setup Window
- Tab to the phone number you want to autodial.
- Hit Shift + Right-arrow until you have selected the portion of the number you don't want to dial. The number displaying just above the Phone icon shows the portion of your phone number that will actually be dialed.
- Hit Alt + I to dial.

## AutoDialing From the Phone List

If you have a modem on your computer, you may autodial any number in the Phone List. You must first have set up the autodial parameters in the AutoDial Setup Window. If your phone usage requires dialing a long-distance prefix or suffix, or a credit card number, use the "Access" menu pick.

### Using the Prefix

- Under the label "Dial Prefix?", click on the word "Yes" if you want to use the Prefix, or on "No" if you do not.  
or
- Hit Ctrl + P to toggle between "Yes" and "No".
- If you click "Yes" you may edit the prefix in its text box. Choosing "Yes" means the prefix will be dialed before the number you choose for autodial.

### AutoDialing

- Drag the phone number you want to the Phone icon underneath the list of phone numbers, and drop it there.  
or
- Tab to the phone number you want to use, and hit Alt + I.

[Long-Distance Access](#)

## Long-Distance Access

You may need to access a long-distance service, or use a credit card or calling card number when you dial. To integrate this into your Autodialing, choose "Access" from the Phone List or Phone Entry menu, to bring up the Long-distance Access window.

### Using Long-Distance Access

- Type in any number you might need to access your long-distance carrier in the "Carrier Access Number" box.
- Place your credit card or Calling card number in the "Card number" field.
- A third "Freeform" field lets you put in any additional numbers you may need to dial.
- To integrate these access numbers with your normal Autodialing, click on the "Dial" button next to the number at the time you need them dialed. Typically, you would dial the "Carrier Access number", then drag-and-drop the phone number of the person you want to call, then dial the "Card number".

## The Ascii Import

If you have Phonebook data in another product, and you want to include that data in LifeTime's phonebook, the Ascii Import allows you to do that, if the product that contains your phone data can export it as a comma-delimited Ascii file.

### Import File Format

The file that you import into LifeTime must have an initial record that has the field names corresponding to the data fields on the records that follow. Each field name on the initial record must be enclosed in double quotes, and there must be a comma between each to separate them. Each of the corresponding pieces of data on the records that follow the initial record must also be in double quotes, and be separated by commas.

Here is an example of how the first few records on such a file might look; in an actual file, the records would continue on off the page to the right. There can be no wrapping to the next line for any record, no matter how long it is:

```
"Last Name", "First Name", "Mid. Init.", "Company", [etc.]...  
"Alby", "William", "G", "Tourney Discount Sports", [etc.]...  
"Anderson", "Julia", "", "IDI Inc.", [etc.]...
```

Notice how, in the third record, the person has no middle initial, but there is still a double-quote with no space in between, sitting in the position where the middle initial would be. This is because every field named on the initial record must have a corresponding data field on each of the records that follow, even if it is just represented by the double-quote with no space in between. Notice also that the commas separating the fields in all records sit directly after one double-quote and directly before the other, with no spaces separating them.

### Importing the Data

- Choose "Ascii File Import" from LifeTime's File menu.
- On the Ascii Import window, click on the File menu and choose "Import File", and specify the import filename in the dialog box that comes up.
- The field names on the first record of the import file will appear in the list box on the left. Fields describing LifeTime's phone data fields will be in the list box on the right.
- Click on the first entry in the left-hand list box. Then click on any field in the LifeTime list box on the right, that you want to match up the import field with. Notice you can choose 'Do not Match Field' in the LifeTime box, if the import field does not seem to correspond with any LifeTime phone data field.
- Repeat this process for EACH and EVERY field in the Import fields box. Each must be matched up with something in the LifeTime box. As you pick each match, it is confirmed and appears in the list box at the bottom of the window.
- You can match more than one Import field with the same LifeTime field. This will probably happen for the fields you match into LifeTime's 'Home Address' and 'Business Address' fields, which might be broken into 'Street', 'City', 'State', 'Zip', etc. in the Import file. Just remember that the fields will be put together in LifeTime in the same order they appear on the incoming data record.
- Before doing the actual import, check through the list box on the bottom to make sure every field is matched up right. If not, cancel out of the window and start again from scratch.
- Click on the 'Process Import File' button, and the phone records will be added to LifeTime's phone database.

### Data Touch-Up

If you matched multiple fields into the LifeTime Home and Business Address fields, each of those fields will come out separated by several spaces in the address box displayed within LifeTime's Phone Entry window. After the automatic word-wrap within the Address box display, you may want to change where the line breaks occur in the address. This can be accomplished with a simple touch-up that must be done from within LifeTime's Phone Entry window.

- Get the first record you want to touch-up into the Phone Entry window.
- Click with your mouse directly in front of any word that you want to begin on the next line down, so the cursor is sitting in front of that word, with no space separating them.
- Hit the Enter key on the keyboard. This inserts an invisible New Line character that causes everything following it in the address to move down to the next line.

## Doing Finds

Using the Find Window, you can search for any text string in the information you have placed into LifeTime. You may search through all the information, or limit the search to certain categories. After a search is done, you may narrow the results further by searching for a second text string only within the items that matched on the prior search. This process may be repeated as many times as you like.

### Mouse/Keyboard Method

- Pick "Find" from the "Options" Menu. The Find Window appears.
- Type in the text you want to find. Do not surround it with quotes, or they will be searched for, too. And, the search does not distinguish between capital letters and small letters.
- Choose the Categories where you want to look for the text string.
- Choose the "Find" button. The list box will show what items contained the text string, if any.
- To do a sub-search on these items, type in the new text string, and check the "Prior Search" category.
- To see one of the items that satisfied the search, double-click on it.  
or
- Highlight the list item you want, and choose the "Select" button.

## Preference Settings

You can customize many of the Display, Print, AutoDial, and other functions. Your settings are then saved permanently until you change them again.

[Setting Time and Date](#)

[Display Defaults](#)

[Print Setup](#)

[AutoDial Setup](#)

[Setting Your Name](#)

[Setting Colors](#)

## Setting Time and Date

You may change or reset the time or date on your computer's clock.

### Mouse/Keyboard Method

- Choose "Date/Time" from the "Settings" pick of the "Options" Menu.
- Type in a new time to set the computer to, or use the radio buttons to adjust for Daylight Savings or Standard time.
- Click on a calendar day to set a new date.  
or
- Type in a valid date
- Hit Enter to have the changes take effect.

## **Setting Your Name**

Your name can display as part of the title bar. After you add it, it can be revised at any time. Get to this window by choosing "Your Name" from the "Settings" choice of the "Options" Menu.

## Setting Colors

LifeTime allows the user to adjust many of the display colors on the main screen.

### How to set Colors

- Pick "Options"/"Settings"/"Colors" from the LifeTime main screen menu.
- Drag any color from the bottom of the Set Colors window to any representation of one of the display parts. You will see the result of the color change displayed.
- Repeat with as many color changes as you like
- Click on the "Return to Defaults" button to return to the original LifeTime default colors.
- Click "Ok" when your color adjusting is done.
- Stop the program and start it again to see your new colors fully implemented.

## **Menus**

All major LifeTime functions can be accessed through its menu system, and in some cases the menu is the only way to access a function.

[The LifeTime Main Menu](#)

[The Popup Menu](#)

[The Notes Window Menu](#)

[The Phone List Menu](#)

[The Phone Entry Menu](#)

## The LifeTime Main Menu

[File Menu](#)

[Edit Menu](#)

[Options Menu](#)

[Window Menu](#)

[Help Menu](#)

## **File Menu**

This menu has picks related to File and Print related functions.

### **Create a Copy**

This allows you to make a free evaluation copy of LifeTime to give to someone else.

### **Ascii Phone Data Import**

You can import Phone data from another product if it can be put in comma-delimited Ascii form.

### **Database Manager**

This allows you to Backup, Archive, Restore, and Purge your Schedule, ToDo, and Phone information. Available only after registration.

### **Report Writer**

For printing or exporting summaries of Schedule or ToDo items in a specified date range. Available only after registration.

### **Registration Key Install**

Once you register your copy of LifeTime, you will receive a Registration Key diskette that will provide a registration stamp to it. After registration, this pick no longer appears in the File menu.

### **Network Use**

This allows you to specify a path and personal ID if you want to store your data on a network drive.

### **Set Default Printer**

Since LifeTime uses your default Windows printer for all of its printing, you can use this pick to easily change between printers that may be available to you.

### **Print**

This pick allows you to perform Daily Item print functions. Its sub-picks allow you to print a given day, week, month, or days you have selected.

### **Exit**

This ends the current execution of LifeTime and closes all files.

## **The Edit Menu**

This menu has Cut/Copy/Paste functions to use in editing item text.

### **Cut**

Brings selected text to the Windows Clipboard, and deletes the selected text from its source.

### **Copy**

Brings selected text to the Windows Clipboard, and leaves the selected text as is.

### **Paste**

Copies whatever text is in the Clipboard to a target item at the place of the caret.

### **Find**

Allows you to search all of LifeTime's data or only that in certain categories, for any text string.

## **The Window Menu**

This menu indicates whether the Phone List or Phone Entry Windows are loaded, but hidden. Choosing the name of one of them brings it to the foreground.

## **The Help Menu**

This menu allows you to choose between various informational topics, and allows you to print out a LifeTime registration order form.

### **Contents**

This brings you to the Contents screen of the Help file you are looking at now.

### **Search for Help on...**

Lets you type in a subject to look for in the Help index.

### **How to use Help**

For those unfamiliar with using Windows Help files.

### **About...**

After you have registered your copy of LifeTime, this pick brings up a window which displays your registration stamp information.

### **Tutorial**

Allows you to view an animated tutorial which gives you an introduction to some of LifeTime's functions.

### **Registration Info**

Displays a window with information on the cost and benefits of registering your copy of LifeTime.

### **Order Form**

This brings up an online order form for your LifeTime registration, which you can print.

## The Notes Window Menu

This menu lets you perform functions on the text of an attached note or Daily Note.

### File

The picks under this choice let you do the following: Import a text file into your note, Print the note to paper, Print the note to a text file, Save the note contents, and Exit the note Window.

### Edit

From the Edit choice you can do Windows Cut/Copy/Paste functions, and a Select All pick lets you do a copy or cut of the entire contents of the note. The Undo pick lets you erase editing changes since you last saved the note. You may also adjust the font used to display the note in the Notes Window, and in a print of it from the Notes Window.

See Also

[Notes](#)

## The Phone List Menu

### File

This has a pick that lets you print the contents of the Phone Book, and an Exit pick for closing the Phone List Window.

### Access

For Long-distance prefix, suffix, or card number dialing, integrated with the normal AutoDial.

### Dial

This pick performs the AutoDial function for the selected telephone number. It has no sub-picks beneath it.
