

Rockets and Bombs

Rockets and bombs are used by both you and your opponents.

The status bar at the bottom of the screen displays up to 10 rockets and bombs, if you have them.

Rockets and bombs do not affect cars that are flashing, since they have picked up the invincibility item.

If you drop bombs or fire rockets while in the air, they will fall to the ground. If you fire at jumping cars, you may shoot under or over them and miss.
