Telecommunications

E-Mail fax v1.1.0

Prepare files for e-mail with this handy program. When you select this program under your Chooser, select E-Mail fax instead of a printer. When you print, it saves the file as an e-mail fax file. View files with the fax viewer or save them as self-reading files.

Focus EmailTool 1.0.3

Individualize your E-mail
Individualize your E-mail and other correspondence with this small application. EmailTool automatically inserts selected signature and quotes at insertion points. Its floating window appears on top of all other windows,
regardless of which application is currently running - you don't need to switch applications.
* Store and select up to 32,000 signatures
* Store and select up to 32,000 personalized quotes
* Access from within any application
* Sample quotes included
(Application by Focus Software)

Joe's Pager 1.5.6

Keep in touch with your office or staff using alphanumeric pagers. Send text messages directly from your Macintosh and its modem to a pager via your commercial pager service.
Business-> Volume 228/August '96

List Cleaner 1.0

It's in the mail. Clean up your mailing lists and remove duplicate entries with this utility. Set your own parameters to remove addresses, from similar to exact matches. Choose to review addresses before the program removes them. The resulting address list is saved as a separate file to preserve the original.
