RGB Editor for Windows v1.4

RGB Editor is a small utility useful for selecting and creating RGB colors for programming projects. The values of the red, green and blue components are displayed and easily transferred to your source code files. Custom colors can be defined and saved for use in other coding projects. Custom colors swatches can also be copied to the clipboard.

If you have comments, questions or find any bugs in RGB Editor feel free to contact me on CompuServe or America On-line.

While RGB Editor is offered as FreeWare, if you feel that you want to pay something for it you are welcome to send any amount you wish.

RGB.ZIP File Descriptions:

RGB.EXE   - The RGB Editor application.
RGB.WRI   - The Documentation file.

Release History:

v1.0   In-house development and testing.

v1.1   Added splash box for distribution.

v1.2   Added facility to copy current RGB and
         Hexadecimal values to the clipboard.
         Removed CLT3DV2.DLL from the zip file.
         This DLL is no longer required.

v1.3   Added facility to copy color swatch
         to the clipboard, and options to

specify the color swatch size.

v1.4   Fixed several minor bugs.
        Moved all strings to the resource
        segment for future foreign language
        translations.
