Fastball Fractions 3.0

Play ball

This excellent math game is based on a baseball metaphor. You start your innings by typing your name. Each pitch comes in the form of an arithmetic question. Add the fractions correctly and your player moves around the bases.

- * Choose from five difficulty levels
- * Reach the Hall of Fame to print a Certificate of Achievement
- * Save your games
- * One or two players
- * Play against the computer

(HyperCard Stack by France and Associates)

Make-A-Problem v1.18

This mathematical game really adds up. When you start, you are asked for several items - a boy's name, your favorite food and a kind of animal, for example. Then you are given mathematical word problems using the words you entered. There are two levels of difficulty and you can choose how many questions you want to answer. You even get a trophy if you do well.

Math Stars 3.2

Featured

Counting stars

Practice addition, subtraction, multiplication and division with this rewarding program. If you answer 10 out of 10 questions in a round within the allotted time, you earn a gold star in the Class Roster window. After earning 10 gold stars, your name is placed in the Hall of Fame. This game is great fun with colorful graphics.

- * Keep track of gold stars earned
- * Maintain up to 10 names
- * Set your own time limit
- * Include negative numbers

(Application by Roger M. Clary)

Children's-> Volume 231/November '96

Math Worksheet Creator v1.5

Create math worksheets with this useful program. The equations on the worksheets have missing numbers you need to fill in to solve the equations. Worksheets can have multiplication, addition and subtraction problems in horizontal or vertical form. You can also specify a numerical range for the numbers in the equations.

Children's-> Volume 227/July '96

Missile Math v1.0

Featured

Use your math skills to stop numbers as they fly across your screen. The program tells you a specific decimal place, like hundreds and thousandths. When the number flies by, shoot that decimal place. If you're right, the number is destroyed. If you're wrong, the number gets away. The better you become, the faster the numbers fly.
