Animal Babies 1.0

Cute and cuddly

Three fun games in one! In the first section, match the picture of the baby to its mother. In some cases, when the baby closely resembles the mother, this is easy. However, there are several babies included which look quite different from their mothers (for example, a caterpillar and butterfly). In the second section, children are asked to remember and select the correct name of each baby. The third section gives additional information about each baby in the game. This section requires reading skills.

- * Learn about baby animal names

- * Hear the names of animals spoken

- * Three sections of play

- * For 3- to 8-year-olds

(Application by Brandy Rogers)

New Member Volume XXI-> Children's

Barnyard Ark

Learn about endangered livestock animals with this HyperCard stack. Review descriptions and pictures of animals including the Milking Devon Cattle, the Domestic Bronze Turkey and more. There is a quiz after every few animals to test what you have learned. You can even print your test results.

Children's-> Volume 224/April '96

Birds of the Brigantine

This HyperCard stack contains pictures of 26 different birds from the Edwin B. Forsythe National Wildlife Refuge in New Jersey. Each picture is in full color and identifies the bird shown. If you're an ornithologist or just like birds, you'll love this stack.

Children's-> Volume 226/June '96

ModRoc v1.0.1

Blast off! This program helps you design safe, stable model rockets. Designing a rocket is as easy as choosing parts from a catalog and telling the program where they go. As

parts are added, the program continuously displays up-to-date information on center of gravity, center of pressure and stability margins so you can instantly see how the rocket is shaping up. It removes much of the tedious and error prone calculations of the stability factors.

Education-> Volume 222/February '96

Space Station

You'll space out with this fun program. Learn about constellations, planets, solar systems and more. A section teaches about early space exploration, from the invention of rockets to the Mercury Program. It's out of this world! (Hypercard)

Children's-> Volume 227/July '96

Vivarium v1.0

Featured

Create and populate your own world. Choose from four species of animals with different characteristics. Determine what they eat, how intelligent they are and how they procreate. Then let them loose. Watch your species thrive or dwindle. See how they react to their environment, viewing a graph of their statistics.

Water Rocket Fun

Blast off!

Learn about rockets the fun way - by building one! This program teaches you several scientific theories that affect rocket flight, including:

- * Gravity
- * Fuel types, including water, alcohol and mercury
- * Drag coefficient
- * Pressure level
