Font Utilities

Font Box 2.0

Type utility
Analyze and correct corrupted fonts with this handy utility. It performs several maintenance activities to ensure the integrity and organization of your font library.
* Repairs fonts automatically
* Improves system stability
* Eliminates font-related crashes and lock-ups
* Stops inconsistent and jagged printing
* Builds a new, clean font library
* Saves disk space and memory
(Application by Insider Software)

Font Manager 3.11

Manage your fonts
Enable or disable fonts quickly and easily with this font utility. Great if you have a lot of projects with multiple fonts.
* Manage printer fonts separately
* Extensive help
* Organize up to ten font sets
(Application by Ed Hopkins)
Desktop Publishing-> Volume 229/September '96

Font-o-rama!

Simplify font selection dramatically. Includes a dialog box with a multi-column list large enough to display all your fonts simultaneously. You don't have to scroll through a long font menu looking for a particular font. You just click on it.   It's small, fast and very useful.
Desktop Publishing-> Volume 228/August '96

FontFinder 1.0

Font viewer
View all fonts and find special characters with this handy utility. Choose a font from the menu and this program displays all its characters. Click on any
character and it shows the letter's keystrokes. Also, its conversion utility converts between inches, picas, points and centimeters.
* Shows all special characters
* Supports copy and paste
* Shows keyboard strokes to access all characters
(Application by Bishop Shareware)

Monaco Tuner 1.1

Font installer
Use this utility to replace the
system font Monaco with ProFont, included in this   Volume. ProFont is a more legible version of Monaco.
(Control Panel by SQ Software)
Desktop Publishing-> Volume 232/December '96

PopChar Lite 2.7.2

What a character
Access your fonts easily with this helpful Control Panel. Quickly access a font's complete character set. You can even insert any character into your document.
* Available from the Finder menu
* Use in all applications
* Lists complete character sets for each typeface
(Control Panel by Gunther Blaschek)
