Text Editors & Tools

Alpha 6.094

This text editor/word processor has a variety of powerful features. Put Hypertext links into your documents - when you click on highlighted text, you jump to a new location in your document. Other features include the ability to search files for specific text and compare files to see the differences between
them.
(Application)

ASCIIPaint 1.0

Draw pictures with text characters. Press a key and your drawing is made with that character. Choose from several drawing tools, including line, circle, rectangle and pencil. Print your drawings, or save them as text files.
Children's-> Volume 222/February '96

AutoRef 1.2.0

This is a wonderful tool for students who write reports, essays and theses. Generate text styles frequently used in academic publications. Simply create and save the formats you want and use them in your documents. This is a great timesaver, especially when you're working with long essays with numerous references.
Education-> Volume 228/August '96

Dejal Text Utilities 4

Manipulate text files with this collection of three utilities.   Join several text files with TextMerge. TextSplitter works the opposite, splitting one file into multiple files. TextConverter translates extended characters into standard ASCII equivalents, like © into (c). Handy DTP tools.

Dos2Mac 1.2

Convert between DOS and   text files. Drag a text file on this program and it does all the
work. If it is a   file, it's converted to DOS format - if it is a DOS file,
it's converted to   format. It also converts special and foreign characters, such as tildes
and accents.

FindText 1.3.1

You won't get lost with this nifty search program. Locate a string of text in any program
anywhere on your hard drive - or in specified folders. Great for finding
important information.
Business-> Volume 226/June '96
Desktop Publishing-> Volume 226/June '96

FlashWrite II 1.1.0

Jot down notes with this ultimate notebook. Store and retrieve information easily. Create as many note pages as you like. Title your notes and store them alphabetically in an index.
Business-> Volume 227/July '96

JoinFiles 1.0.1

Combine multiple text files just by dragging and dropping. Select
the files you want joined and drop them onto this program icon.
The files will be combined into one file. This is much easier
than cutting and pasting in a word processor.
Desktop Publishing-> Volume 223/March '96

LetterHeader 1.5.4

Print personalized letterheads at the top of your documents with this easy-to-use utility. This Control Panel adds an option to your print dialog box. Select one letterhead for the first page of a document and a different letterhead for the subsequent pages. This feature is a more efficient use of memory and disk space than just pasting the letterhead on every document
you print.

Personal Log 2.1

The premier note processor
Keep multiple, text-based notes in one simple file. Personal Log is perfect for work logs, diaries, research notes and light record keeping. Because it uses
PowerTalk's Digital Signature technology, you can electronically notarize documents, making it perfect for patent notes, engineer logs and patient logs.
* Embed sounds, images and URLs
* Makes full use of Apple's latest MacOS technologies.
* Password protect documents
* Supports drag 'n drop
(Application by Michael F. Kamprath)
Business-> Volume 229/September '96

PowerReplace 4.1

Replace text in multiple files simultaneously. For example, if you want to replace the word "print" with the word "write" in five different files, create a filter and drag the five files onto the program icon. The word is replaced in every file. You can even search for words with wildcard characters.
Desktop Publishing-> Volume 222/February '96

Print2Pict 3.7.1

Print any text file to PICT image format with this utility. As an added benefit, you can create stand-alone documents called postcards. Convert your document to a postcard and any colleague or client with a   can view it. Ideal for document sharing. NOTE: Drop this extension into your System folder and it becomes available as a
Chooser selection
