Gene 4.1.1

Featured

Building a family tree

A comprehensive genealogy database management program. It stores genealogical information in cards representing people, places, pictures and events. Store family data and notes, draw and print family trees and pedigree charts, show how different people are related, and browse the database. Perfect if you are interested in family history.

- * Store images and text
- * Hypertext links for nonlinear navigation
- * Extensive documentation
- * Examples included

(Hypercard by Diana and David Eppstein)
