

File Management

AutoCat 1.7.2

Catalog disks quickly with this Control Panel. Whenever you eject a disk, this program creates a folder with aliases of all the files on the disk. Search these aliases with the standard Apple file search. Choose to catalog automatically or catalog all your disks at once with its Archiving Mode.

Business-> Volume 222/February '96

Disklosure 1.3.2

Format disks quickly and easily with this program. There are several format options, including wiping all free space with zeros - this prevents sensitive data from being recovered. Disk names can be retained or renamed - even add a sequential counter to the disk names if you are formatting multiple disks.

Latest & Greatest-> Volume 225/May '96

DiskTracker 1.0

Keep track of the contents of your disks, hard drives, CDs and removable hard disks with this handy organizer. You can automatically catalog disks just by inserting them into your drive. Create catalogs that are easy to browse and search. Print floppy disk labels using a variety of templates - or create your own.

Latest & Greatest-> Volume 224/April '96

Forward Delete 1.1.4

Delete forward with this handy extension. This program enables a key that deletes characters in front of your cursor. Some programs already feature this option - now you can use it in all your programs.

NOTE: Copy Forward Delete onto your System Folder.
