ColorSieve 1.0

View color information from any area of the screen. This utility is a floating window that magnifies an area surrounding the mouse cursor. The color directly under the cursor is displayed in the window. Select from RGB, HSL, HSV and CMYK color modes.
Desktop Publishing-> Volume 223/March '96

Cool Cursor 1.0

Customize your computer with this extension. Just drop it in your system folder and it changes your mouse pointer from the standard black and white arrow into a cool high-tech arrow.
Latest & Greatest-> Volume 226/June '96

Disklosure 1.3.2

Format disks quickly and easily with this program. There are several format options, including wiping all free space with zeros - this prevents sensitive data from being recovered. Disk names can be retained or renamed - even add a sequential counter to the disk names if you are formatting multiple disks.

Finder Windows 1.0

Access open windows easier with this menu extension. This adds a
menu item, listing all open files. To go to an opened file, simple
select it from the list. You don't need to move or close windows.
Complete with stack and arrange commands.
