

NeuroDiet Version 2.2

DISCLAIMER

NEURODIET IS PROVIDED "AS IS" WITHOUT REPRESENTATION OR WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION, ANY REPRESENTATIONS OR ENDORSEMENTS REGARDING THE USE OF, THE RESULTS OF, OR PERFORMANCE OF THE INFORMATION, ITS APPROPRIATENESS, ACCURACY, RELIABILITY, OR CORRECTNESS. THE ENTIRE RISK AS TO THE USE OF NEURODIET IS ASSUMED BY THE USER. IN NO EVENT WILL STEPHEN WOLSTENHOLME BE LIABLE FOR ANY DAMAGES, DIRECT, INDIRECT, INCIDENTAL OR CONSEQUENTIAL, RESULTING FROM ANY DEFECT IN NEURODIET, EVEN IF STEPHEN WOLSTENHOLME HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THIS DISCLAIMER SHALL SUPERSEDE ANY VERBAL OR WRITTEN STATEMENT TO THE CONTRARY. IF YOU DO NOT ACCEPT THESE TERMS YOU MUST CEASE AND DESIST USING NEURODIET IMMEDIATELY.

System Requirements

NeuroDiet runs under Windows 95,98, NT 4 or later.
It requires about 500Kb of hard disc space (including the help file).

Performance

NeuroDiet learns using back propagation. This is a process that uses floating point arithmetic and thus is assisted by a co-processor. NeuroDiet learns about 12 times faster with a co-processor. Most PCs that are capable of running Windows 95 or Windows NT will have no performance problems when running NeuroDiet.

Version Changes

- v 1.1 Included "Tip of the day".
 - Exclusion threshold determined by average rather than dominant symptom.
 - Food and Symptom deletion no longer waits for network reconfiguration.
- v1.2 Smaller font.
 - Output increased to four columns.
- v1.3 Improvement to find food sensitivities faster.
 - Over compensation to five day delayed reaction fixed.
 - The limit of ten symptoms enforced.
 - Added action to generate current lists.
 - Example starter file included.
- v1.4 Not released.
- v1.5 The number of epochs used during "Update Connections" increased. This improves the detection of food sensitivities but it takes a little longer to complete the connection update.
 - Limit of ten symptoms changed to a warning and limit of twenty symptoms enforced.
 - Fixed the bug that was preventing the display of lists without the Inclusions list.
 - Added progress bar for "Update Connections".
 - Added "Unclassified" list.

Added options to handle unclassified foods, sort foods into order of score and change the start of day time.

v2.0 Allows symptom and food data to be entered for missing days.

Added View buttons to tool bar.

Added View Symptom History.

Changed View Food to display the previous 50 days.

Added Symptom / Food Relate facility.

Fixed the bug that caused failure to detect new day if a whole week had been skipped.

v2.1 Fixed the bug that allowed partial symptom deletion. Partially deleted symptoms are now recreated so that they can be deleted completely.

v2.2 Changed reaction curve to be more responsive to the previous three days.
