

CrystalGraphics Introduces

3D Sensations[™]

for Presentations

Energize your presentations!

Introducing *3D Sensations* for Presentations

The first 3D software to energize corporate presentations by adding cutting-edge 3D transition effects into PowerPoint.

3D Sensations for Presentations

It is “way” cool

- ◆ It adds television style effects to your presentations!
- ◆ It includes synchronized sound effects to enhance realism!
- ◆ It will “wow” your audience!
- ◆ There is nothing else like it!

3D Sensations for Presentations

It has broad appeal

- ◆ It works as a plug-in to Microsoft PowerPoint 97!
- ◆ It will energize any PowerPoint presentation with just a few clicks!
- ◆ Its effects are pre-created & ready-to-use!
- ◆ Plus, it's inexpensive & transportable!

3D Sensations for Presentations

It is incredibly easy to use

- ◆ Its two user tools automatically appear in PowerPoint's Slide Show menu!
- ◆ The “Add 3D Transition” tool emulates PowerPoint's Slide Transition dialog!
- ◆ The “View Show With 3D” tool shows your 3D enhanced presentation!

3D Sensations for Presentations

It has a clear practical value

- ◆ It will help your presentation stand out from the crowd!
- ◆ It will wake up your audience and keep their attention!
- ◆ It will help you look smart and, therefore, makes your message more believable!

3D Sensations for Presentations

The technology behind it

- ◆ Built on top of an advanced 3D animation engine developed by CrystalGraphics
- ◆ Supports both Direct3D and OpenGL
- ◆ Plays WAV files for sound effects
- ◆ Supports most popular 3D graphics cards

Who is CrystalGraphics?

“Our mission is to become the leading provider of compelling and easy-to-use 3D graphics software that helps businesses communicate more effectively.”

CrystalGraphics' Product History

- ('87) Introduced Crystal TOPAS, the first successful 3D animation package for the PC
