

4,000 Classic Images

Thank you for purchasing 4,000 Classic Images.

Installation

This is simple, there is nothing to install.

You can copy images to your hard drive for faster access but even this isn't necessary. Please refer to your operating system's user guide for instructions on copying images from one volume to another.

Compatibility

This entire CD contains graphic files that can be imported into most popular word processing, graphic, and page layout applications. How that is accomplished is determined by which application you use. Most applications have an Insert, Import, Place, or Open command that allows you to import a graphic image into a document. Please see your application's user manual for detailed instructions.

File Formats

The images on this CD are available in three popular graphic formats TIF, GIF, and PCX.

Using with Other Machines

These images have been optimized for use under the Macintosh[™] and Windows[™] operating systems. They will also work with DOS, Unix, Apple II, Amiga, and any other computers that can read an ISO 9660 CD-ROM, and has an application that can read the file formats listed above.

Networks

This CD has been designed for use on single-user machines and may not operate correctly across networks. If you experience any problems with corrupted files when accessed across a network, move the CD drive to a single machine and try again.

Modifying the images

It is possible to modify the images on this CD by using a graphics application like PhotoShop[™], CorelDraw[™], DeskPaint[™], or any others that can read the file formats. Using your favorite graphics application you can colorize, resize, distort, crop, or combine images to create your own unique image. Please see your application's user guide for detailed instructions.

Technical Support

Technical support for all Zedcor products is available using many methods including online services, fax, voice, and the mail.

Online services:

We have a forum on America Online (keyword: ZEDCOR) for questions and can be reached with e-mail at the following addresses:

America Online: Zedcor TS
Internet: ZedcorTS@aol.com

Fax:

Faxes are responded to as quickly as possible, usually within a day.

Fax: 520.881.1841

Phone:

Technicians are available 9AM to 5PM Mountain Standard Time, Monday through Friday (excluding national holidays). Late mornings and late afternoons are usually our quietest time with early mornings and noon the busiest. If you can't get through, please try again during the slower time periods.

If you call after hours, our answering system contains answers to frequently asked questions. Listen to the options and choose the one that matches your problem. If none of the options can answer your question, please call the next day during normal business hours.

Voice: 520.881.2310

Mail:

Or, you can write us at:
