The ABC Network Communications Department is proud to present Stephen King's: "The Langoliers" press information on CD-ROM and "MAY '95 SWEEPS PHOTOGRAPHY" CD-ROM in a dual disc package.

"The Langoliers" CD-ROM contains a 12 minute overview of the movie accompanied by video clips from each of the actor's performances. There is also an expanded section of production notes with video interviews of the executive producers and director.

The photographs are represented on "The Langoliers" CD-ROM. The high resolution photography used for reproduction is found on the "MAY '95 SWEEPS PHOTOGRAPHY" CD-ROM.

The "MAY '95 SWEEPS PHOTOGRAPHY" CD-ROM also contains the text files of "The Langoliers" cast, producers and Lead Sheet documents displayed on the LANGOCD. These documents are located in the LANGODOC folder.

To Run the Langoliers CD program, install QuickTime 2.0, as outlined below. Then from the File Manager, double-click on **lango.exe** or from the Program Manager by selecting **FILE...RUN** and typing **D:\lango.exe**, where D is the drive letter of your CD-ROM drive.

Both CD-ROM discs are written for Macintosh/HFS and MS-DOS/ISO 9660 formats.

These are the preferred settings and system requirements for LANGOCD:

* Use the fastest CD-ROM drive available

* Monitors may be set to millions of colors, otherwise 256 colors setting is recomended. The LANGOCD MacroMedia Directorª application is designed to run on computers that support 256 colors. If your system supports thousands or millions of colors, leave the monitor control panel settings at the highest level for the best quality digital movie playback.

* Select a monitor setting of 640 x 480 for large monitors.

SYSTEM REQUIREMENTS FOR IBM PC's & Compatibles:

486 or better processor
8 mb RAM
Windows 3.1 or later
256 or greater color depth support
Double speed or faster CD-ROM drive
QuickTime v2.0

SETTING UP QUICKTIME

QuickTime[a] v. 2.0 or later must be installed on your computer. Run the setup program for QuickTime in the QTW directory on the LANGOCD either by double-clicking on **SETUP.EXE** from the File Manager or from the Program Manager by selecting **FILE...RUN** and typing **D:\qtw\setup.exe**, where D is the drive letter of your CD-ROM drive.
