

Body Insight

Insight Reference Series

PLEASE FREELY DISTRIBUTE THIS DEMO VERSION OF BODY INSIGHT TO BBSs AND ONLINE SERVICES

Thank you for downloading and evaluating this demo version of Body Insight! Informative Graphics Corporation is a leading developer of educational software products designed to help you learn more about yourself and your world. Body Insight for Windows and Body Insight for DOS can be found at most popular retail software outlets and mail order houses. Also look for these other titles in our Insight Software series:

- * Auto Insight - Explore the automobile from bumper to bumper. Available now in both DOS and Windows versions at your favorite software retailer.
- * PC Insight - Learn how computers work, inside and out. Coming soon to a software store near you!

In this demo of Body Insight, only the bones in the "Skeletal System" (first top row icon button) and any items in the "Cardiovascular System" ("heart" icon) have text descriptions. This part of the program is designed to give you more detailed information about the highlighted item. The Insight product line has every item identified. Each image has a detailed description to help you learn more about the topic. Over 2,500 parts and systems of the human body are identified in Body Insight.

The "Cardiovascular System" is a working example of the product's hyperlinking. For example, to move to a cut view of the lungs:

DOS version: Select "Lungs" once to highlight the item, and again to jump to the "Lungs" image.

WINDOWS version: Double click on "Lungs."

This demo has been distributed as two files:

WINBODY.ZIP - Body Insight for Windows demo version.

DOSBODY.ZIP - Body Insight for DOS demo version.

Body Insight for Windows System Requirements

- * IBM PC or compatible computer.
- * 386 or greater processor.
- * 4 Megabytes of memory (RAM).
- * DOS 3.0 or higher.

Installing and Running the Body Insight Demo

WINDOWS:

To install the Windows version of Body Insight, copy the contents of WINBODY.ZIP to a directory of your choice. From Program Manager, pull down the File menu and choose Run. Enter *drive:\path\WINBODY.EXE* and press ENTER or click the OK button. To add Body Insight for Windows to a Program Manager group, open the group you wish to add it to, pull down Program Managers File menu, choose New and then Program Item. Enter the information that Program Manager requires.

DOS:

There is no installation necessary for the DOS version of Body Insight. Simply copy the contents of DOSBODY.ZIP to a directory of your choice, change to that directory and enter BODY at the command line.
