Thank you for purchasing PhotoDisc Volume 39: INDUSTRY AND TRANSPORTATION. It is our goal to deliver the finest photography available anywhere to our valued customers.

\*NOTE: VOLUME 39 is a two disc set. Disc A contains the browsing catalog and LO RES image files. Disc B contains the HI RES image files and VIEWER.EXE (your JPEG decompression software).

This CD-ROM contains low resolution TIFF and high resolution JPEG versions of every image pictured in the Volume 39 printed catalog. You may access the low resolution TIFF files directly from the :\ PHOTOS \ LO RES directory on the CD-ROM and import them into any popular graphic design or page layout application. In order to access a high resolution JPEG image from the :\ PHOTOS \ HI RES directories, you must first decompress the image (see VIEWER.EXE below) and save it to your hard drive as a TIFF. The resultant file can then be imported into other applications in the same fashion as a low resolution TIFF file.
