AminetGuide

1.1 Welcome to Aminet CD 12

WELCOME TO AMINET CD 12 ↔
Deutsch

Copyright 1996
Urban Müller

Aminet is now the world's largest collection of freely ↔
distributable
software for *any* computer system. Check out the celebration contest if
you like. And this CD brings you the best of it, with a record batch of new
software (no

previous
CD comes close) and everything you need for making

music:
760M of

new stuff
out since the making of Aminet CD 11
300M of modules from various sources

75M of music software
which is the complete Aminet collection
10M of instruments for use with tracker software
10M of top downloads used to complete the charts
5M of

commercial
software: OctaMED 5.04 and Symphonie

For the following types of data we have special guides:

Games	A list of all games sorted by quality
Demos	An index of compatible demos, sorted by quality
Pictures	A database with scaled down versions of the images

Information is also available on:

New features
What the previous CDs didn't have

Access software

1.2 About the author

The guy who selected, arranged, documented and sorted the contents of this CD for you is me, Urban Müller, the main administrator of Aminet. All the support software is from me, too. You can reach me at umueller@wuarchive.wustl.edu if you have any feedback about this CD.

Of course this CD would not have been possible without the help of the countless people involved in the administration of Aminet, not to mention the thousands of uploaders. Special thanks go to:

Matthias Supp - for most of the German descriptions
Matthias Scheler - for co-moderating Aminet.
Lars Eilebrecht - for beta-testing.

If you ever wanted to know what my job at Aminet is: juggling gigs
Well illustrated by an MPEG animation of me juggling harddisks at a meeting. Also available a still image at better resolution. Not shown: Lots of even shorter runs :)

Yours truly....

Urban Müller

1.3 Subscriptions

Subscriptions

If you'd like the Aminet CD sent to you every two months and save money at the same time, then ask your dealer about subscriptions. If you order

from Fred Fish's "Cronus" in the USA, the subscription price is \$59.95 for 4 issues, which means about \$15 per issue instead of about \$20. The price does not include shipping (\$4 anywhere worldwide). The address:

CRONUS
1840 East Warner Road #105-265
Chandler, AZ 85284
U.S.A.

FAX: (602) 491-0048
Voice: (800) 804-0833 or (602) 491-0442

Stefan Ossowski's Schatztruhe GmbH in Germany also offers subscriptions. See this

order information

You may want to ask you local dealer if he offers subscriptions, too.

1.4 Previous Aminet CD's

Previous Aminet CDs

As you probably know, the Aminet archive has much more material than fits on a single CD. If you want all of it, you need both Aminet Sets and Aminet CD 9 and up. The CD's so far:

CD	Date	Contents	Set	Date	Contents
1	Jul-93	new	1A	Feb-95	dev util
2	Mar-94	new	1B	Feb-95	gfx pix text docs
3	Jul-94	new	1C	Feb-95	demo game comm hard
4	Nov-94	new+mods	1D	Feb-95	mus mods biz disk misc
5	Mar-95	new+games			
6	Jun-95	new+demos	2a	Nov-96	util text docs biz
7	Aug-95	new+clipart	2b	Nov-96	gfx pix misc
8	Oct-95	new+mods	2c	Nov-96	demo game dev disk hard
9	Dec-95	new+games	2d	Nov-96	mus mods comm
10	Feb-96	new+fonts			
11	Apr-96	new+maps			
12	Jun-96	new+mods			

If you want to make sure you don't miss a CD, check our subscriptions

Each single Aminet CD also has special highlight, so if you're interested in, say, Games, you may consider Aminet CD 9.

Aminet CD 11
- The newest, the best, and 700 maps (Apr 1996)

Aminet CD 10

- The newest, the best, and 2000 fonts (Feb 1996)
- Aminet CD 9
- The newest, the best, and 900 games (Dec 1996)
- Aminet CD 8
- The newest, the best, and 2000 mods (Oct 1995)
- Aminet CD 7
- The newest, the best, and 9000 pictures (Aug 1995)
- Aminet Set 1
- The complete Aminet on a newly made 4 CD set (Jan 1995)
- Aminet Set 2
- The complete new Aminet on 4 more CDs (Nov 1995)

1.5 Aminet CD 11

Aminet CD 11 - The newest, the best, and 700 maps

Aminet CD 11 contains, you already guessed it, about 1 gig of freely distributable software. The newest archive included is from March 2nd. Apart from the new software, the CD concentrates on maps collected from various sources. The space is used as follows (after decompression):

- 670M of software newer than Aminet CD 10 (all time high!)
- 150M of high resolution maps covering most areas of the world
- 80M of top downloads
- 20M of commercial software: XiPaint 3.2, full version

XiPaint is a nice 24-bit paint program that works gfx boards and just about any image format. It is licensed to the buyer of the CD only, and not freely distributable. Check the upgrade offer that comes with it.

The freely distributable part is composed as follows:

- 500 mods, most of them new
- 200 utilities
- 200 communications programs
- 800 programs of other categories

plus 700 maps in 24-bit JPEG format, covering most areas of the world. The maps have an index that is sorted by continent, and a search facility.

Aminet CD 11 costs US \$19.95 or DM 25.

- Order info
- Index

1.6 Aminet CD 10

Aminet CD 10 - The newest, the best, and 2000 fonts

Aminet CD 10 contains, once more, over 1 gig of freely distributable software. The newest archive included is from January 3rd. Apart from the new software, the CD concentrates on fonts collected from various sources. The space is used as follows (after decompression):

- 520M of software newer than Aminet CD 9
- 330M of fonts, each font in several formats
- 170M of top downloads

... plus two special highlights:

- PageStream 2.2, unrestricted, with manual+upgrade deal
- TypeSmith 2.5 (latest), slightly restricted, with similar deal

These two excellent programs give you an absolutely top of the range DTP combination. They are licensed to the buyer of the CD only, and not freely distributable.

The freely distributable part is composed as follows:

- 650 mods, most of them new
- 300 utilities
- 300 communications programs
- 700 programs of other categories

plus 2000 fonts in Postscript, Intellifont and bitmap format, stored in large archives but easy to preview and extract. All fonts are hinted for better appearance, and most fonts are available in all formats.

Aminet CD 10 costs US \$19.95 or DM 25.

1.7 Aminet CD 9

Aminet CD 9 - The newest, the best, and 900 games

Aminet CD 9 contains, as usual, over 1 gig of freely distributable software. The newest archive included is from November 4th. Apart from the new software, the CD concentrates on games from various sources. The space is used as follows (after decompression):

- 500M of software newer than CD 8 (280M newer than Set 2)
- 330M of games
- 100M of electronic books
- 100M of top downloads

These consist of:

- 930 games (directly startable)

640 mods
300 docs
140 pictures
90 demos

...plus 2400 utilities of all kinds.

Aminet CD 9 costs US \$19.95 or DM 25.

[Order info](#)

[Index](#)

1.8 Aminet CD 8

Aminet CD 8 - The newest, the best, and 2000 mods

Aminet CD 8 contains over 1 gigabyte of freely distributable software. The newest file included is dated Nov 4th. Besides the the new software, the CD concentrates on pictures and modules. The space on the CD is used as follows:

650M of software newer than Aminet CD 7
500M of mods
50M of top downloads

The mods were collected from various sources besides Aminet and were not found on earlier Aminet CDs.

Aminet CD 8 costs US \$19.95 or DM 25.

[Order info](#)

[Index](#)

1.9 Aminet CD 7

Aminet CD 7 - The newest, the best, and 9000 pictures

Aminet CD 7 contains over 1 gigabyte of freely distributable software. The newest file included is dated June 26th. Besides the the new software, the CD concentrates on pictures and clip art. The space on the CD is used as follows:

650M of software newer than Aminet CD 6
350M of images
50M of top downloads

These consist of:

1500 pictures (+7700 clip art images in large archives)
1250 tools
380 mods
130 games
70 demos

The pictures were collected from various sources besides Aminet and were not found on earlier Aminet CDs.

Aminet CD 7 costs US \$19.95 or DM 25.

Sorry, no detailed information available.

1.15 Aminet CD 1

Sorry, no detailed information available.

1.16 Aminet Set 1

Aminet Set 1 - The complete Aminet on 4 new CDs

As you probably know, there is a big archive behind all those Aminet CDs. Aminet Set finally brings you the complete archive on four newly created CD-ROMs.

If you already have several Aminet CDs, buying the Aminet Set still makes sense for the following reasons:

1. Even if you have all Aminet CDs, you still lack a lot of software from Aminet. And the less CDs you already have, the more additional software you get from the set:

If you already have	The set gives you an additional
Aminet CD 1,2,3,4,5	467M of Aminet software
Aminet CD 2,3,4,5	512M of Aminet software
Aminet CD 3,4,5	851M of Aminet software
Aminet CD 4,5	1191M of Aminet software
Aminet CD 5	1681M of Aminet software

2. Aminet Set 1 presents its data more nicely than the previous CDs. As you can see on this CD, all games and demos can be started directly, the images are in a nice image data base, and the modules are presented in a list that is sorted by style. Also, there are a lot of German descriptions as well as a Fish and a SaarAG index. This is missing on the older CDs but present on Aminet Set, so buying some of the same data a second time can make sense.
3. Aminet Set 1 is better organized than the previous CDs. Until now, the Images from Aminet have been scattered on all the Aminet CDs. Aminet Set brings them all on the same CD, just as all other types of data. Also, using Aminet Set you can search the complete Aminet very quickly and easily, including a very fast full text search of all the .readme files.

Aminet Set costs US \$39.95 or DM 59.

Order info
Index (huge!)

1.17 Aminet Set 2

Aminet Set 2 - The new Aminet on 4 more CDs

As you probably know, there is a big archive behind all those Aminet CDs. Aminet Set 2 brings you the complete new archive on four CD-ROMs.

If you already have several Aminet CDs, buying the Aminet Set still makes sense for the following reasons:

1. Aminet Set 2 completes Aminet Set 1 to give a complete snapshot of the Aminet archive.

2. Aminet Set 2 presents its data more nicely than the previous CDs. As you can see on this CD, all games and demos can be started directly, the images are in a nice image data base, and the modules are presented in a list that is sorted by style. Also, there are a lot of German descriptions as well as a Fish and a SaarAG index.
3. Aminet Set 2 is better organized than the previous CDs. Until now, the Images from Aminet have been scattered on all the Aminet CDs. Aminet Set brings them all on the same CD, just as all other types of data. Also, using Aminet Set you can search the complete Aminet very quickly and easily, including a very fast full text search of all the .readme files.

Aminet Set 2 costs US \$39.95 or DM 59.

Index (huge!)

1.18 New stuff on this CD

New stuff since Aminet CD 11

Most of the software on this CD is unseen before. But here we're exclusively talking about what was uploaded to Aminet since the previous CD was made, *not* about what was integrated from other sources.

The best way to browse the new files is looking at the directory sorted new files index of this CD. Select your general area of interest, and then hit the 'Browse' button in AmigaGuide to hop from directory to directory. Another approach is to check the charts of most downloaded files, where most of the files listed are new (the very latest have been omitted, tho). Finally, check our list of

recommendations
of the most interesting new
files. If you miss a file, check the list of
deletions

And of course you can check the new files index sorted by directory, by name or by age, or search for something in the CD index.

1.19 Recommended new uploads

The following are, in my opinion, a few highlights among the new software on this CD. Not mentioned here are mods, games, pix and demos, since their highlights are mentioned in their own index files. Check the mods, though, we have loads of good ones this time.

In the Internet area, you find a very decent Web-browser, a real time audio tool for the net and a tools that lets FTP sites (can you think of a good one? :) be a file system.

AWeb.lha comm/tcp 263K 3 Fast, graphical WWW browser V 1.1 bugfix

```

unrealaudio.lha      comm/tcp      49K   1 Real time audio from the internet v0.2
FTPMount_1_0.lha    comm/tcp     113K   4 Mounts FTP sites as part of a filesystem

```

In the development area, we have an assembly optimizer, a new C++ compiler demo, a GUI editor update, and a very popular batch language.

```

popt.lha             dev/asm      153K   9 A powerfull assembly source optimizer - v1 ←
  .0b
StormC_DEMO105.lha  dev/c        1.3M   4 StormC: ANSI C & C++ Development System
IEdit226.lha        dev/gui      467K   5 Very powerful GUI Editor
perl5_bin.lha       dev/lang     1.1M   6 Amiga port of Perl 5.002. (Binary files)

```

If you need smaller disks, you can create them as a file on a partition. If you don't need your 16bit RAM, you can (sick idea, I like it) use it as swap space!

```

HFM2_1.lha          disk/misc    94K    9 Virtual disks on HD V2_1
memdev37_3.lha      disk/misc    21K    4 Uses 16bit RAM as swap space for VMM

```

As usual, we have lots of interesting reading material. I especially recommend the show report in ar406, which includes an AT press conference, and the IRC chat session about Walker.

```

cdguide_200.lha     docs/hyper  154K   9 List of AMIGA-CDROM's V2.00 (German Only)
ar404.lha           docs/mags    85K    7 Amiga Report 4.04, March 14, 1996
ar405.lha           docs/mags    95K    5 Amiga Report 4.05, March 31, 1996
ar406.lha           docs/mags   113K   2 Amiga Report 4.06, April 23, 1996
walker_log.lha      docs/misc    25K    7 Complete log from the Walker IRC conference

```

Also check this system friendly 3D landscape engine.

```

VoxelEngine25.lha   gfx/aga      71K    8 Landscape routine. V2.5

```

On the emulator front, we have, of course, another ShapeShifter update and a HP48 emulator (need a ROM image). Also, there is a truly impressive astronomy program that lets you see plantes in motion.

```

Alcuin1_0.lha       misc/emu     166K   2 HP 48 (S/SX/G/GX) emulator. V1.0
ShapeShifter.lha    misc/emu     223K   9 Macintosh II emulator, V3.4
VWorlds20.lha       misc/sci     1.1M   2 Images of sky from any planet or comet.

```

If you ever wanted to make music for the Amiga, check (besides the commercial programs on this CD) Protracker. If you want compress sampled sound, there's no way around this MPEG encoder.

```

Protracker351.lha   mus/edit     170K   2 Protracker V3.51, MOD Tracker
musicin.lha         mus/misc     163K   7 MPEG audio encoder (MC68030/040/060+FPU)

```

Still, there are new editors popping up:

```

BlacksEditor.lha    text/edit    222K   6 Wonderful Text Editor (Version 1.01)
ProgED20.lha        text/edit    492K   4 Powerful Text editor - Better than GoldED

```

The utilities section is full of little goodies, but you may want to check these first.

```

Madhouse.lha        util/blank   297K   9 V2.01, >60 modules possible! (NEW FEATURE)
winshuffle.lha      util/cdity    7K     6 Activates next window (and more). Version ←
  1.12.
AmigaMetaFile.lha   util/libs    40K    3 A Graphics Meta File Format also EPS,CGM, ←
  GEM Outpu
TBreak.lha          util/sys      3K     7 Breaks Tasks with patternmatching
taskbar5_3.lha      util/wb      29K    3 Win95 style taskbar v5.2 (Speed increase)

```

As always, enjoy!

1.20 Deletions

Deletions on this CD

The following archives were intended to be on this CD, but either had licensing conditions that seemed to forbid CD distribution or .readme files that asked for removal from the CD.

1.21 Music software from Aminet

Music software on Aminet

Apart from the usual new software and the integrated material, this CD also contains all the Amiga music software that is now on Aminet. This should help you create, edit and convert music wherever needed. The categories are:

mus/edit	Composing software
mus/midi	MIDI software
mus/misc	Miscellaneous
mus/play	Sound players

1.22 Commercial software on this CD

Commercial software on this CD

The software mentioned here is not freely distributable. It is solely intended for you, the buyer of this CD, and no one else. Please respect that.

In the 'Tracker' directory you find everything you need for making music. There is an unrestricted version of OctaMED V5, a very nice 8-channel music editor, that is soon going to be superseded by the much improved SoundStudio.

In addition, there is the music program Symphonie, which is trying to give high quality output with 16 bit samples and high sample rates. The version included can only handle 8 tracks. Stand-alone replayers are not available yet, though.

Finally, we have the excellent sample editor SoundFX. SoundFX is registered and fully usable shareware, however we have only the 68000 version; FPU versions can be a lot faster.

I've also included a 700 instrument collection in mods/inst, so you can start right away.

Have fun making some good music, and please don't let it all be techno :)

1.23 New features

New features of this CD

- In 'New Stuff' there is now a list of files deleted because of license
 - We have a nicer disk icon, thanks to Adriano De Minicis
 - Most importantly: An animation of
me
juggling gigabytes
 - There is now a text with a contest for the world size record
 - All the software (except for some mods) has German descriptions
 - bugfix: Extracting matches from Aminet CD 3 in SingleFind now works
 - bugfix: The multi channel indicator in Guides/Mods is now correct
-

1.24 Access software

Workbench

Browsing:

The first thing you will want to do is browse the contents of the CD. The best way to get a quick overview is having a look at the overview in this document; the very first links. Another method is to check the file Lists/New_Dir (if you already have the previous Aminet CD) or Lists/Index_Dir.

Wherever you see a list of files with descriptions, you can click to archive name to start an unpack tool. You will be asked for a destination directory (the default can be chosen in 'Prefs'). After you hit return, the archive gets unpacked to where you selected. For some types of files, you can click a middle button (called 'Start' or 'Play') to view look at the archive contents directly. Some index files play directly without asking (e.g. the Modules and the Games index).

In all index files you can view the .readme file for an archive by clicking the description.

Searching:

After you've become familiar with the contents of the CD, you will often want to search for a specific keyword in the contents of the CD. Just double click the 'Find' icon on the top level of the CD, enter the case insensitive sub string or pattern you want to look for, and you will be presented with a list of files that match your sub string anywhere on their line. You can also search the New_* and Index_* files in Lists by clicking them first and then shift-doubleclicking 'Find'. The resulting document will be of the 'View' type for the toplevel Find program and of the 'Extract' type for all other Find programs. The NewFind and AminetFind search the the list of new files and the list of all Aminet files.

If you drag any of the FindKit drawer in Tools/ anywhere onto your hard disk, you can do searches without having the CD in your drive.

Using the FullFind program in the Tools directory, you can find any word in any readme of this CD. If your word is a prefix of a word in a readme, it will match. To prevent that, append a \$ to your search word. You can enter several search words, separated by blanks, to see only the documents which contain all of them.

See also the documentation for the tools in question: Inspect , Find , FullFind and Prefs .

CLI/Shell

Using a shell is not the recommended way to access this CD. However you sometimes have no choice, e.g. when working under UNIX or MSDOS.

To get familiar with the contents of the CD, I recommend having a look at the file Aminet/INDEX which contains a complete list of all files on the CD in plain ASCII. More ASCII index files found in Lists/, they end in .doc. If you find a file you are interested in, for example, docs/mags/cd32bits-0694.lha , then execute the following commands:

```
cd Aminet/docs/mags
lha e cd32bits-0694.lha ram:
```

to unpack the contents of that archive to RAM. If you don't have the archiver LhA yet, you can obtain it from the Tools/ directory on the CD.

To locate all files that contain foo anywhere in their file name, directory name or description, execute the command

```
search NONUM Aminet/INDEX foo
```

or just use the Aminet find tool:

```
find foo
```

which will output an AmigaGuide document and display it. If you want to find the files on any Aminet CD, use:

```
find IN Aminet foo
```

For further information read the documents on Find, FullFind and Inspect in Tools/Docs/.

Useful stuff

There is a very limited number of unpacked utilities on this CD in the Tools/Useful directory. They are all related to accessing the files on this CD, and you should think about installing them on your HD.

- AmiCDROM is an excellent CD-ROM file system. In the improbable case that your CD filesystem has problems with the Aminet CD, just use this one.
- ARCHandler lets you access the Aminet CD (or any other file system) as if all the lha files on it were directories, ie you don't need to unpack anything. Great stuff.
- Degradar can disable all the advanced features of accelerated Amigas, getting many hardware-bashing demos and games to run.
- ToolAlias can map one default tool name to another. This is useful if you can't change the default tool of a file but want to use a different viewer.
- TrashMaster creates an App-Icon on your Workbench where you can drag icons to delete them. Handy to clean up after an archive has been extracted to RAM:.

1.25 Customizing Aminet CD

Customizing Aminet CD

As you know all too well, CDs cannot be written to. This CD, however, gives you a limited possibility to shape it according to your taste. There are two possibilities, select the links for documentation:

The

Personal

index in the Guides drawer is an Aminet CD index like all the others, with viewing and readme displaying capabilities. The only difference is that you decide what's listed in it and what not.

Clones

are tiny files that pretend to be one of the items on the Aminet CD. You can create, rename and arrange them as you like, and you can put them in WBStartup or ToolManager docks. Of course you need the CD in the drive when you want to use clones.

1.26 Your personal Aminet CD index

Your personal Aminet CD index

In the Guides directory you find, among various static index files an index called 'Personal'. In the beginning it's empty. If you click 'add', you are asked for a search pattern. You can click any of the shown items to add them to your personal Aminet index. However you need to close your Personal index and open it again in order to make the changes visible.

If you press the 'sort' button, the index will be sorted by directory and subsorted by file name. Duplicate lines will be eliminated. Again, you have to close and reopen the index.

With the 'edit' button, finally, you can make any changes to your personal index using your favourite editor. `setenv EDITOR <your-editor>` to determine the editor. Always use line operation (like deleting lines, inserting lines from Aminet/INDEX or reordering lines). Again, you need to reload the index to make the changes visible.

The index looks as if it were stored on the CD. This is not the case, of course. The contents are stored in the file `S:Aminet-PersonalX`, where X is the number of your CD. You can edit or delete it there.

Apart from that, the Personal index behaves like any immediate view index; ie if you click a mod in the Personal index, it will play immediately.

So have a look at your personal index.

1.27 Clones

Clones

There's a few things that you cannot do in a normal Aminet CD index. For example you cannot put an item from the Aminet CD index in a ToolManager dock or a Directory Opus gadget. That's what clones were created for.

Clones pretend to be the Aminet file you created them from. You can move them around, arrange them and delete them as you like. Clones can be started from CLI or from the Workbench, where they have an icon that reflects their type. Starting a clone is equivalent to clicking the according archive name in the Aminet CD index, except for the fact that the action (playing, game or demo starting) will be performed without asking for confirmation. Of course you need to have the Aminet CD in the CD-ROM drive when you start a cloned program.

To create a clone, start the Cloner program. It asks you for a pattern and displays the files matching that pattern. You then click the item you would like to see cloned, maybe change the destination path in the upcoming requester, and hit 'Create' to confirm. Each clone takes about 3K of disk space.

1.28 Some common problems with the Aminet CD

Why are all file names upper case?

For this CD, we have chosen to stick to the ISO CDROM standard. This means that the CD can be read on any system, but it also means that all files names are upper case. However, we also used RockRidge extensions, so file systems that understand them can still use mixed case. The AmiCDROM file system provided in the Tools/Useful directory will give you mixed case on the Aminet CD.

Why can't I read some of the files with the Commodore CD file system?

Because it's buggy. The solution is the same as before: Install the AmiCDROM file system. It's works very nicely.

Why do I have problems with by Xetec file system?

It seems to have problems with our choice of CD formats. However version 2.0 was reported to work fine. If not, again, again: Install the AmiCDROM file system found on this CD.

Nothing happens when I try to show that image/play that mod!

The Aminet extraction software tries to be smart how every pic is shown or mod is played. However sometimes it fails. In those cases you can simply extract the archive and look at it by yourself. Also, you might be running out of memory, see below.

I'm running out of memory!

Viewing an image or playing a mod by clicking it in the index takes quite a lot of memory, since the index as well as the extraction program stay in memory while the picture is viewed. Solutions:

- Set your extraction directory to something different from RAM:, e.g. an (existing) directory on your HD. This can be done using the 'Prefs' program.
- Don't view the files directly from the index. Click on 'extract' first, then close the index, and open the directory your file was extracted to.

Of course combining the two saves the most.

I want to mount this CD on my BBS

We have Files.BBS index files in every directory, so some BBS programs can use the CD directly. Others understand our .readme format already. For MS-DOS BBSes use the index called FILES.MSD. If you would like to copy the files onto HD, you can use the file Aminet/info/adt/TRANSL.TBL (which shows origname and CD-name for each file) to restore the original file names. If you write any additional software or need indices in a different format, please contact me.

I cannot use this CD with my CD32!

This is due to a bug in the CD32 CDROM file system and occurs when you boot off the Network CD or something similar. You can circumvent this bug by mounting a small RAD: disk (about 49 tracks), copy the most important files from a Workbench CD there (c, libs, envarc) and boot off the RAD:. That should get the Aminet CD (and some other interesting CDs) to work.

1.29 What is Aminet?

What is Aminet?

Aminet is a library where software authors can place their freely distributable programs for others to download. The backbone of Aminet consists of about 20 computers all over the world that are linked to Internet, a computer network that connects most universities and many businesses in the world. Many other places, such as 50 BBSes, keep frequently updated copies of Aminet.

Aminet is moderated. Whatever gets uploaded has to be approved before it is made available to the public. However there is no censorship; the only conditions for inclusion in the library are that every file uploaded has a description file in the correct format, and the archive itself is okay and virus free.

What is unique about Aminet is that large amounts of data are made available to a wide audience within a very short time. If a programmer uploads his latest release to Aminet, he can expect that it will have

been downloaded and tested by one thousand people within a week. If he finds a bug in his program, he can distribute an update to the whole world within twenty four hours. In that respect, freely distributable software works far better than commercial software.

You may want to read about the recent , older and ancient history of Aminet, or find out where to access Aminet in your area.

1.30 Getting access to Aminet

Where do I access Aminet?

If you would like to get updated more often than is possible with a quarterly CDROM, you have several possibilities. By far the best way is getting yourself connected to the Internet. Several commercial networks allow access to the Internet. Some of them are (this is not an endorsement, just an information):

USA	Netcom	Voice 1.408.554.UNIX		
	Portal	Voice 1.408.973.9111	Modem 1.408.973.8091	
GERMANY	EUnet	Voice +49.231.972.00	Fax +49.231.972.1111	
SWITZERLAND	EUnet	Voice +41.1.291.45.80	Fax +41.1.291.46.42	

Once you have gotten Internet access you can use the following methods to access the latest Aminet files:

- Mirrors. The normal way to access Aminet is by FTP, which comes with UNIX (program name is ftp). You can use any of the below sites. Most keep only recent files, but ftp.wustl.edu, ftp.cdrom.com, ftp.doc.ic.ac.uk and ftp.luth.se are complete.

Location	Name	IP Address	Path	Files
USA (MO)	ftp.wustl.edu	128.252.135.4	pub/aminet/	ALL

Portugal	ftp.ua.pt	193.136.80.68	pub/aminet/	9000
Spain	ftp.gui.uva.es	157.88.36.190	pub/aminet/	1000

- ADT. This is a front end for FTP that allows easy access to Aminet. Get it from misc/unix/ and compile it on your UNIX box.
- FSP. Aminet Files can be downloaded from the FSP site ftp.luth.se at port 6969 and from disun3.epfl.ch port 9999. ftp.wustl.edu and ftp.doc.ic.ac.uk have FSP on port 21, but can't be reached from everywhere (just try). Uploads are accepted at wustl and luth.
- Telnet. ftp.doc.ic.ac.uk strikes again. You can telnet to 146.169.2.1 and log in as 'sources', which gives you a UNIX account where you can download the files on src using commands like 'sz' and 'kermit', or just browse around.
- NFS. The only Aminet site that allows NFS mounting of the archives is ftp.wustl.edu. FTP there and read the details in /README.NFS
- IRC. On Internet Relay Chat, you can talk to various server robots like Mama, LitBot and MerBot, to do queries and retrievals. Find out more about them using '/msg mama help', for example.
- Finger. To find out what's been uploaded to Aminet within the last week, enter 'finger aminet@ftp.etsu.edu'.
- Gopher. Gopher is specially supported by several Aminet sites. Just type 'gopher <sitename>' or 'gopher -p <startpoint> <sitename>'.

USA (MO)	ftp.wustl.edu	1/pub/aminet/info/goph
USA (TX)	ftp.etsu.edu	1/AmigaArchives/Aminet
SWITZERLAND	ftp.eunet.ch	1/pub/aminet/info/goph
GERMANY	ftp.uni-paderborn.de	1/Service/FTP/Direct/ftp-server/aminet
UK	ftp.doc.ic.ac.uk	1/pub/aminet/info/goph

If you don't have full internet access, you can try one of the following methods to get access:

- Mailserver. The Aminet site src.doc.ic.ac.uk has an email server that sends out uuencoded binaries. Send a message with HELP in the body to ftpmail@doc.ic.ac.uk. You can also use ftpmail@decwrl.dec.com to retrieve files from any Aminet site, but please use an American one to save bandwidth. Send HELP there for information, too. Germans try ftpmail@uni-paderborn.de .
Searching the aminet index for a file name, or uploading can be done at aminet-server@wuarchive.wustl.edu (as usual, send HELP there for information).
Also, the RECENT and CHARTS files are available from an automatic

e-mail server. Send mail to announce@cs.ucdavis.edu with the single word "help" (no quotes) in the body to find out how to use the server.

- Modem. The following BBSes carry up-to-date Aminet files. Most have more phone numbers than we can mention here, call to see a list of the others. List sorted by phone number. (Please notify me of Aminet BBSes that are not on the list)

- Anonymous UUCP. In Germany, you can access the Aminet files at the phone numbers of Brainwave BBS (see above) using the following entry. Download the file "Aminet:INFO" for more information.
anarchy Any SER 38400 ATD<Phone> BBS. ..\c ogin: uanon sword: uanon
- FIDO. If you want to file-request Aminet files, you can do so by requesting the file INFO from 2:246/2006.0. The BBSes which have a FIDO node number mentioned above allow file requests.
- Mailing lists. If you want to get the list of new uploads mailed every week, send a mail with 'SUBSCRIBE aminet-weekly foo@bar.edu' in the body to listserv@wunet.wustl.edu or if you want daily updates, just use 'SUBSCRIBE aminet-daily' instead. Replace foo@bar.edu with your email address, of course. Keep the welcome mail in case you forget how to unsubscribe...
- Usenet. A list of recent uploads is posted every week to the newsgroups comp.sys.amiga.misc and de.comp.sys.amiga.archive.
- EZINFO. This is an internet BBS in Switzerland. Here you can download by Kermit or ZMODEM, but you need to be verified to become user. Modem dial 01 251 20 02, then type 'call b050' to connect to EZINFO. Also try telnet kometh.ethz.ch and 'call b050' from internet.
- Aminet-on-disk. You can order single Aminet files (3 DM per disk) or per-directory subscriptions (2 DM per disk) from Martin Schulze,

Parkstr. 14, 66806 Enseldorf, Germany. Phone: ++49 (0) 6831 506171, email masc@coli.uni-sb.de . Other media like opticals or DAT's are available, too. Send 3 DM in stamps or \$2 to get an index disk with instructions.

1.31 Sending software to Aminet

How do I submit something to Aminet?

If you are an author of freely distributable software, you may be interested to get your software onto Aminet. Aminet gets your software to a lot of people very quickly, and is free of charge for most of its users. And, while this policy lasts, you can order a free Aminet CD by email! Send HELP to aminet-server@wuarchive.wustl.edu for more information.

If you would like to get your piece of freely distributable software onto Aminet and you don't have access to the Internet, you can check the BBSes listed

here

if they forward uploads to Aminet. The

aminet-server@wuarchive.wustl.edu accepts uploads by email, send HELP there for instructions. If all fails, you can still send a diskette (that will not be sent back, sorry) with your upload to Martin Schulze, whose address you find in the access list as well.

Be sure to read the upload instructions very carefully. Faulty submissions are in danger of being deleted.

1.32 Ordering subsequent CD's

Order information

A new Aminet CD appears every two months. You can expect about 500M of new software on every CD, plus the currently most popular files, plus enough files from other sources to fill up the CD to its limit. Order subscriptions or single CDs from the following companies:

Company	Offerings	
-----	-----	
- Germany/Europe

Have a look at the
older Aminet CDs
, too.

1.33 The disclaimer

Disclaimer

All files on Aminet have been virus checked. However, new viruses that were unknown at the time the CD was made could still have slipped through, so we cannot make any warranties. Thus you should run a virus checker on all programs extracted from the CD to be absolutely safe.

Note that, although you have paid for the CD, you don't own all the programs in it. Some of them are distributed as Shareware, which means that you have to pay for its registration if you use it regularly. Please support the concept of shareware; if a program is worth using, it's also worth paying for.

You're getting the FD software on this CD is free of charge. The price of the CD just pays for the collecting and presenting it, and for the pressing of the CD.
