1.2 Copyright Notice

AntiClick - Stop the Clicking Drives!

AntiClick is Copyright (c) 1996 Thomas van Gulick .

All rights reserved.

Copyright notice

This program is freeware.

You may use this program without charge.

Copying, inclusion in public domain collections (including CD-ROM collections), redistribution (also via the Internet) is allowed provided that the following conditions are met:

Redistributions must include the unmodified program and all its documentation and other files.

Redistributions must reproduce the above copyright notice, this list of conditions and the follwing disclaimer in the documentation or other materials provided with the distribution.

The redistributor is not allowed to charge more than a reasonable small fee for collecting the material, the actual copying and/or the information carrier used for the redistribution.

No part of this program or the documentation may be included in any commercial product without previous written permission from the author.

1.3 Disclaimer

Disclaimer

The author of this program cannot be held responsible for any damage that this program might cause. If you are using ScreenSwitch, you will do so at YOUR OWN RISK. Note however that it has been thoroughly tested using "Enforcer" as well as "Mungwall". But this is, of course, no guarantee that it is 100% bug-free, and can/will not crash at some rare occasion.

1.4 Description

Introduction

This program will stop drives DF0:, DF1:, DF2: and DF3: from clicking. The drives will continue working normally.

1.5 Installation

Installation

Copy the program to anywhere you like, for example the C: directory.

1.6 Usage

Usage

The program is CLI only. Simply start it and it will make the drives stop clicking. There is no possibility to selectively stop 3 or less drives from clicking, it's all or nothing. I have done this because it seemed a bit useless to only make one drive stop clicking.

1.7 About the Author

About the Author

AntiClick was programmed by Thomas van Gulick.
