1.2 What do you need to run the programs

Most of the programs that Nicron Productions make just need a basic amiga, with the exceptions of KewlChat which needs a Modem and really also a HD but everything we write is for everyone to use so all program should just run off a basic amiga. ↔

Main Menu

1.3 Introduction

Nicron Productions is a fairly new company but we have been set up to keep the amiga alive, if no-one else will, we will, we plan to still make good programs at cheap prices, thats why most things we make are Freeware except programs where you get lots of options and took us some time to make. ATM there is only 3 programs in are collection but soon it will expand so look out for the Nicron Productions Logo. There is a few ways to get Nicron help and support by either of the following ways :- ↔

Email : Nicron@Jinxster.Demon.Co.Uk

Write : C/O Chris Seward
10 Scafell Close
Eastham
Wirral, Merseyside
L62 9EU
ENGLAND

IRC : #Nicron - Look out for ^Chris^ ask him questions

Main Menu

1.4 KewlChat - The best 2 modem link chatting program

KewlChat is one of my favourite programs as it allows 2 friends to connect there modem to each other and talk it's easy to use and in the registered version no modem commands have to be typed in.

KewlChat is the only program i have wrote that has to be registered for the full version but i think it's worth it when you see what you get.

If you would like to see a DEMO version first please send £1.00 on an ENGLISH cheque or in ENGLISH cash, i will NOT except anything else please make the cheque payable to Chris Seward.

Or you could always go stright ahead and get the FULL version at a bargain price of £2.00 i will still only accept ENGLISH money and ENGLISH cheques for the full version.

Please send your money to the address in the
Contact
bit. Or you
could email for the info pack about KewlChat.

Main Menu

1.5 BackChat - Swear shout and take all you anger out on this program

BackChat is a classic program, quite a few have been done and ↔
here's
another one, well your wondering, What is it? well it's an Eliza style program where you type something in and it answers back with a funny reply i can't tell you what version i'm up to because it gets updated to much. For the latest version send a disk with a stamp to my address which can be found in the

Contact
section of this guide. Or you can always email
me at Nicron@Jinxster.demon.co.uk

Main Menu

1.6 Kee-Bored - A great little keyboard

Kee-Bored is the latest program i have wrote but NOT the best, it ↔
's a
little key-board with three built in tunes two drum type pads and over 15 keys, the keys don't have proper key board sounds and you don't get the write letters either but it's good to mess around with. If you want this program just send 1 disk and a stamp to my address which can be found in the

Contact
section of this guide. Or you can email me at Nicron@Jinxster. ↔
demon.co.uk

Main Menu

1.7 Author - About Chris Seward

Chris Seward (Me) is the only member of Nicron Productions he ←
does
all the work and makes all the programs i wouldn't mind more members
so if anyone wants to join just
Contact
me and i'll sort something
out with you. I am 13 years old but don't let that put you off, no-one
else seems to do anything for the amiga so i will :) I will always stick
with the amiga even if no-one else will, i believe good programs at low
prices will save the amiga. All my programs are written in amos, ATM, but
i am hoping to start writting programs for the palmtop computer the Psion
if anyone wants any info contact me.

Main Menu

1.8 Get your hands on the source code

ALL source can be obtained from me for a small price,
contact
me with your money and what source to what program you what and ←
you will
recive the source code to that program, the only program you CAN NOT
get the source code to is KewlChat so DO NOT send money asking for
that. All source code costs £1.50 including P&P.

Main Menu

1.9 Future products

ATM i don't really have any ideas so ideas are welcome, But.. ATM ←
i'm
planning to write a Beat-Em-Up game with another company called Xylem
if you want to find out more about the game write to Sean Talbot at :-

Sean Talbot
101 Sole Farm Ave
Great Bookham
Surrey
KT23 3DG

If you do contact Sean mention Nicron Productions and Chris Seward otherwise he won't know what your on about.

I am also making a little program called StockCarRacing, where you bet on a car and if you win you get double your money if you want a demo write to me and ask.

Main Menu

1.10 My Custom worms levels

I have also created some worms levels for the game worms, if you would like them they can be obtained from the Aminet in game/misc or you could email me and i'll send them to you, i have created so far :-

3Worm.lha	-	3 Great levels for worms including, rocky, lines & ABC
MadWorm.lha	-	1 good but mad level for worms
WallWorm.lha	-	The BEST worm level i've made and ever seen D/L NOW
WallWorm2.lha	-	Two more wall levels - Includes torture level
Snowy.lha	-	2 Good snow levels for worms
WormCraze.lha	-	4 levels for worms including the CRAZYest worm level i've ever seen

Main Menu

1.11 NEW products OUT NOW

Number100 is a great new game just programmed on the 26/8/96 the idea of the game is to guess what number the computer is thinking of, ok it may sound like a simple game but once your playing it, it can get quite good. A built in option is it tells you weather the number you guessed is higher or lower from the number it's thinking. ATM there is a load hiscore option, but i'm still trying to get the save to work, at the moment V0.5 has been released and can be obtained from me for a disk and stamp or just email me and i'll mime it to you.

GuessIt is a bit like hangman, only you get as many goes as you like, you can have a one player game against the computer for £1 or 50p if you use email. There are two cheat modes which can be found out from me for just an email, this game has been released and can be obtained from me for and email, send a disk with stamp or can be found on the aminet in games/think.

Main Menu

1.12 Nicron contact places

Nicron Productions or
