1.3 Copyright

This package is freely distributable, provided that no fee ↩
other than the
nominal fee for disk copying is charged.

YOU MAY NOT SELL ANYTHING OF THIS PACKAGE FOR PROFIT, IN NO WAY, NOR IN-
CLUDE IT IN A COMMERCIAL SOFTWARE PACKAGE WITHOUT THE WRITTEN CONSENT OF
THE AUTHOR.

Special permission hereby is granted to put this program on an AmiNet CD or
to distribute it via the AmiNet network.

Publishers of disk magazines who want to include this program onto their
coverdisks also have permission to do so.

Applying to the above is that this distribution remains
unchanged
.

1.4 Disclaimer

The software and its manual distributed in this package are ↩
delivered on
an "as is" basis. The
author
makes no warranties, either expressed or
implied, regarding this package. The entire risks as to the results and
performance of this product is assumed by you.

IN NO EVENT WILL THE AUTHOR BE LIABLE FOR DIRECT, INDIRECT, INCIDENTAL, OR
CONSEQUENTIAL DAMAGES RESULTING FROM ANY CLAIM ARISING OUT OF THE
INFORMATION PRESENTED HEREIN AND/OR AS TO THE RESULTS AND PERFORMANCE OF
THE SOFTWARE INCLUDED IN THIS PACKAGE.

1.5 System Requirements

OS 2.0+

Although I have no means to test it on a 2.0+ system, I see no reason
why it shouldn't work.

Compiled with SAS/C 6.57 on an A1200/030 with 6Mb RAM.

Tested on a plain A1200 and an A1200/030 with 6Mb RAM.

1.6 Installation

Just copy it to your C: directory.

1.7 Usage

What's it for? Well, obviously to open and close the Workbench screen.

WBScreen is a CLI-only program, intended to use in conjunction with FKey.

Parameters:

```
  OPEN                       Opens the Workbench screen.

  CLOSE                      Closes the Workbench screen,

  DEFAULT=<pub screen name>  Makes the specified public  screen the de-
                             fault  one. If  set to  AUTO it  makes the
                             frontmost screen the default one, premised
                             that this is a public screen.

  DELAY=secs                 Wait for specified number of seconds. Only
                             for DEFAULT parameter.
```

Script Example:

```
  IF EXISTS EZNet:

    CD DH1:Comms/IBrowse
    C:Run IBrowse
    C:WBScreen CLOSE DELAY=2 DEFAULT=IBrowse

  ENDIF
```

This script starts IBrowse, immediately closes the Workbench screen and then waits 2 seconds before making the IBrowse public screen the default one (in this case IBrowse opens a public screen named IBrowse).

FKey example:

```
  C:WBScreen CLOSE DEFAULT=AUTO DELAY=1

  C:WBScreen OPEN DEFAULT=Workbench

  C:WBScreen DEFAULT=AUTO
```

If the name of your public screen contains white spaces, you should enter
it in between quotes like this:

  C:WBScreen CLOSE "DEFAULT=My Public Screen"

You may also use the DEFAULT option without OPEN or CLOSE to easily make
another screen the default one. This is very handy if you want to make
the screen you're currently working on, the default one, to make system
requesters or e.g. a shell open on it.

1.8 History

1.00 WBScreen can only open and close the Workbench screen.

2.00 Now WBScreen can also make a specified public screen the default.

2.10 First public release.

      If DEFAULT=AUTO is specified, it now makes the frontmost screen the
      default one, no matter what name, premised that this screen is a
      public screen.

1.9 Bugs

              None known.

 Please send bug reports to
               me
               .

1.10 Contents

No matter how you got this package, it should consist of the following:

Name: Bytes:

src/SCOPTIONS   265
src/WBScreen.c   3232
WBScreen   3008
WBScreen.68020   2956
WBScreen.guide   5922
WBScreen.guide.sig   152
