1.2 Was ist es

Maustaste ist ein kleines programm, das es ermöglicht CLI-Anwendungen, z.B. die Startup-sequence zu stoppen und darauf zu warten, das die linke Maustaste gedrückt wird.

Das Programm sollte aber nur in SHELL-Skripts verwendet werden, da es auf der WorkBench nicht funktioniert.

Mousekey stop any SHELL-Script, and wait for a hit on the left Mousebutton. This programm run only under SHELL. No WORKBENCH!

1.3 install

Einfach den Befehl Mousetaste nach C: kopieren und von der SHELL aus aufrufen. Das Programm gibt KEINE Meldung aus, die sagt das die linke Maustaste gedrückt werden soll. Somit kann das programm auch vor IPrefs eingesetzt werden.

Copy this programm to your c: directory, then call it from any SHELL-Skript, etc. Startup-sequence. There is no Output to the Screen.
