Chapter 1

DirText

1.1 DirText

```
                                            DirText

                »   (c) by Software Failure/Airsoft «
                    ===============================

            What does DirText?
               Why was this prog written?

            Requirements
               What you need to run it

            Copyright
               Read this before starting

            How to use
               Infos to use

            Author
               Some infos about me

            Greets
               Greets to some friends
```

1.2 Author

```
If you wanna send me a postcard or an email, don't hesitate.

Airsoft is also searching for members.
```

1.3   What does DirText?

Dir Text reads your ASCII files and converts every line to a file in a chosen directory.

This looks very cool and is great, but simple effect.

1.4   Requirements

Dir Text requires at least OS2.0 and reqtools.library from Nico Françios.

A faster processor and fast ram would be very useful.

1.5   Copyright

Dir Text is copyrighted by me, Andreas Falkenhahn. All rights reserved. This prog is cardware. If you use it, it would be nice if you send me a postcard from your hometown.

reqtools.library is © by Niço François

1.6   How to use

Simply doubleclick on the icon to start and hear the great sound (thanx to placid/vision and 4-mat).

First click on about and see some infos.

Now click on create it. You'll now asked, where to create the files. Select a dir and click on OK.

Now you'll be asked to select an ASCII file. Select the one you've edited with an normal ASCII editor like GoldED or MegaED.

Now the conversion will begin. If all went succesfull you'll hear another nice peace of sound.

```
ERRORS:
```

The most existing error is the wrong chars requester. That means, that aa
few chars can't be used as filenames, here are two: "/:\"
The prog will show you which char has activated the error. So you can fix
it.

So, thats all folks! Use it & have fun, but don't forget to send me a post-
card.

1.7 Greets

Greets and thanks fly to:
