1.4 DVC tells me strange version strings...

```
                                     Libraries check

   If the "Libraries check" find a library on your system thats more
   actually than in LibGuide, so send me please the relevant information
   with the actual size...

   Did you get version informations from DVC like this?

      68040.library        65535.2
      hisoftbasic.library   1988.4
      kd_freq.library       1991.1991

   If you get version informations higher than V100.0, please control the
   version of the library with c:version.

      1.Shell:> version xxxx.library full

   If the result is e.g.: 2.-1 or 3.-1 then read
   the words from Roger Hàgensen:
```

```
   >DVC has some problems with version checking by several libraries.
   >I've attached some examples. I hope you can change this little. I know,
   >that it is a big problem with the different version strings. :-(

   "Some authors do not follow the standard way of making a idstring,
    thus those files do not show reliable version info.
    Those files that have a correct however, should always be correct.
    But sadly it is impossible for anyone to know if a file has
```

```
    a good or bad version info, and we don't want to use more time
    on such messy things, complain to the authors of the files,
    it is their loss if they don't have a correct version/idstring..."

-------------------------------------------------------------------------------

   BTW: Did you find in LibGuide libraries with a size of "0"?
        I would be greatful if you can tell
                me
                 the size of this
        actual libraries.
```

1.5 Some words to the authors of the Libraries

```
                    In the last time I found some libraries, with the same  ↩
                       name
        but different authors and different functions.
        But here is a problem for all users of these libraries.

        Kai Hofmann (Author of
                 »date.library«
                ) has an inspiration
        to register the names of the libraries.

        In his opinion we need a Library Naming Guideline or
        a central Register Place, to solve this problem.

            !!!
                 Register the name of your library.
                  !!!
```

                If you know which programs that require libraries listed here,  ↩
                   please EMail
me at

                 age@thepentagon.com
                 NetForward

and tell me the latest versions.

Please, use command »version ....library file full« and if possible, use
also "DVC" V2.5 by Roger Hågensen.
This program tells you also the date and the author (if possible).

There have been numerous Workbench versions from V1.1 to V3.1 and each one has had some updated libraries with the upgrade.
Workbench 1.2 and 1.3 were upgraded many times by Commodore.
Workbench upgrades from V2.0 thru V3.1 have many Libraries added, deleted or moved into Kickstart ROM.
Generally it is GURU time or very unstable operation to use OS Libs for any other version of the OS than they were intended for !!!

There seems little reason in listing Libs that are in Kickstart ROM since the user cannot update those Libs without upgrading the Kickstart ROM and Workbench OS...

Vxx.x were normally associated with the OS identified as follows:

```
V31.x = OS 1.1 = A1000
V33.x = OS 1.2 = A500, A2000, avail for A1000
V34.x = OS 1.3 = A500, A2000, A2500, A3000 (KickROM's), avail for A1000
V36.x = OS 2.0 = A3000, avail for A500, A2000, A2500
V37.x = OS 2.0 = A3000, avail for A500, A2000, A2500
V38.x = OS 2.1 = A500+, avail for A500, A2000, A2500, A3000
V39.x = OS 3.0 = A1200, A4000
V40.x = OS 3.1 = A1200, A4000, avail for A500, A500+, A2000, A2500, A3000
```

I don't have specific knowledge of Amiga models not listed eg. A1500

Roger Hågensen
MSI Software
emsai@online.no
http://www.sn.no/~msi/index.htm

He is the author of DVC.

Roger, thanks for the ability to distribute it with LibGuide.
Dear reader of this guide, So you are be able to check your
libraries easily.

Please respect the hard work of Roger and download the complete
DVC archiv from Aminet. (util/sys/DVC.lha)
DVC 2.5 can handle device/-Handler files also, like those in
DEVS: and L: and also Datatypes etc.
Here you can get some information.

He is the author of the new Guide of custom BOOPSI classes.
You can find the new guide on Aminet (docs/lists/ClassesGuide.lha).

He wrote also a little program for the LibGuide to register
the name of libraries much easier. Its called LibForm.
```

Stuart, thanks for the ability to distribute it with LibGuide.
