```

1.18 Directory selection help

You are looking at the directory sorted version of the contents ←
listing of
this CD. Every top level directory is one AmigaGuide page. Just click the
directory you would like to see. Help on viewing and extracting the files is
available

here
.

You can also do a search from this page. Matches will be sorted by
directory, thus equivalent to using the 'Find' tool directly. If you only
want to search a specific directory, pick one and press 'search' there.

1.19   File view help

Whenever you see an Aminet file list, you can click the archive name to
unpack that archive to RAM:, where a new directory will be created for
it so you can clean up easily.

The only exception is the top level 'Index' file where clicking the
archive name will:

```
  - View the graphics inside an archive (directory pix/ and gfx/anim/)
  - Play the sounds inside an archive   (directory mods/ and mus/smpl/)
  - Display the texts inside an archive (directory docs/)
  - Extract the archive to RAM:         (all other directories)
```

Also, you can click the description of the archive to view the .readme of
the same archive. Note that the readme files without a + in front of
their description are usually short, with no more info than you see
in the list anyway.
