## 1.29 Letter selection help

You are looking at the alphabetically sorted version of the [↔](#) contents listing of this CD. Pick a letter by clicking on it, or click 012 for the files that don't begin with a letter. Help on viewing and extracting the files is available

here

.

You can also do a search from this page. The matches will be sorted by name.

## 1.30 File view help

Whenever you see an Aminet file list, you can click the archive name to unpack that archive to RAM:, where a new directory will be created for it so you can clean up easily.

The only exception is the top level 'Index' file where clicking the archive name will:

- View the graphics inside an archive (directory pix/ and gfx/anim/)
- Play the sounds inside an archive (directory mods/ and mus/smpl/)
- Display the texts inside an archive (directory docs/)
- Extract the archive to RAM: (all other directories)

Also, you can click the description of the archive to view the .readme of the same archive. Note that the readme files without a + in front of their description are usually short, with no more info than you see in the list anyway.
