a BBS menu using MAXs Function 34, eg: "gremlins:sys-stats/sys-stats".

The programs that the doors uses (eg: Info, avail, etc..) should all be located in your C: directory. If not, then find them. You must also put the following line in your "user-startup" sequence:

```
"date >gremlins:sys-stats/_LASTBOOT.txt"
```

Also, you may or need to change "Sys-Stats.sysop" and "Sys-Stats.nfo".

You get the idea, but
 contact
 me if you need help, or...!?

Use this door at your own risk, it's provided as is... So don't blame me!

Fluffy Net in the "BBS community" is still alive and kicking due to a few
of us showing the "support and dedication" towards this almighty Network.
Thanks to Steve Clack for taking the HUB role, and thanks to Dave for his
role as the hub after Niki left, well done. For those who gave Fluffy Net
away and don't contribute in writting messages, for whatever reasons then
off with your head, both of them! ;o) Anyways, Fluffy Net rOCKs and help
Steve and each other to keep it alive, for as long as possible. At least
till I make it overseas so we can keep in touch, hehe. <marty party's on>

Oh yes, I may have mentioned it before or some of you may have picked it up already (those who read the HEX or code in doors), but in most of my doors I have written, there are little msgs or just a few words usually located in the HEX at the end of each program/door. Just thought I'd let you all know.. yes, I get bored sometimes! <grin>

Fucking "c" and "o" keys are dying and pissing me off! ococococ.. Aargh!

You know our trip overseas, does anyone in England seriously want to put us up for a few weeks or months, or.. We'll pay board and all that shit! Anybody, please... help, oooh.. why not?! <sigh> Actually, I'M SERIOUS!! If you can or willing to, then email me, or.. It will be appreciated...!

Another weekend is upon us, signing off

FUCK OFF
