 UnInstall v1.0 is Copyright © Emax SC

Distribution
```

```
    Image Descriptor is released as Freeware. It may be copied and spread as
    long as you want.
```

1.3 Introduction

```
  Introduction

   Image Descriptor is small program with you can
   add your own description to images.

   Well, i know that you can use PPaint or DPaint
   to do this.

   But!. Those great programs can't add description
   to small brushes and they are not free.

   Here comes ID. It can add description to any GIF (87a, 89a)
   and IFF ILBM images.

   Its very easy and its FREE!
```

1.4 Installation

```
  Installation

   Installation is very easy! Just clik on Install icon and install
   script do all work.

  Removing

   Removing is easier than installing. Run "Uninstall" program
   and it remove all ID files.
```

1.5 Usage

```
  How to use Image Descriptor

  In main window you see five buttons:

   " link load } @{b}OPEN@{ub} button  @{
   " link note } @{b}NOTE@{ub} button   @{
   " link view } @{b}VIEW@{ub} button   @{

  Select button for more information about it ..
```

1.6 Loading images

```
Loading images...

 After clicking on this button a file requester
 will appear.
 You can select file for load.

 Default #?.(GIF|IFF|ILBM) pattern is set but you
 can change it and load file with any name.

 IF it wasn't valid image or if you dont have
 enought memory to load that file ID will inform
 you about it.
```

1.7 Saving images...

```
Saving images...

 After clicking on this button a file requester
 will appear.
 You can select file and ID will write image
 to this file.

 If you select file already exists ID lets you
 choose to overwrite it or to select other file.

 A File Comment will be writed with this file
 contains descriptiom added to image.
 If description is longer than 75 characters
 ID will cut it and add " ..." at the end of
 File Comment.
```

1.8 View image

```
Viewing images

 This is new in v1.4.3.
 When you select this button ID will load MultiView with
 path of image loaded into memory.

 This button may be disabled in this situations:
  - MultiView is not present in C: drawer (it must be here
    becouse ID look there for it)
  - ILBM or GIF datatype is not installed.

 If you done watching just quit MultiView and you
 will back to ID.

NOTE:
  MultiView is NOT included with ID.
```

1.9   Image information

```
Image information...

 After clicking on this button you see
 a window with few informations.

 You may found that two different windows
 are open.

 If ID have in memory GIF image it shows
 you info about GIF.
 IF it is ILBM you see info about ILBM.

 Why two windows?
 Its simple. GIF and ILBM are very different
 images. ILBM images don't have progressive
 displaying and dont have transparency index.
 GIF images dont have bitplanes.

 But few informations are the same.
 Like:
  - image size
  - screen size
  - position

 The last information is about datatypes.
 If ID can't finds datatypes, VIEW option
 will be disabled.
```

1.10   Image description

```
               Image description

 After clicking on this buttons a small
 window will appear asking you for your note.

 Like in
             INFO
             mode, here
 you may also see two different windows.

 If you load ILBM image you may now choose
 few things.

 Annotation - clicking here your
 note will be added as annotation.

 Name - clicking here your
 note will be added as image name.

 Author - clicking here your
 note will be added as author name.
```

```
Copyrights - clicking here your
note will be added as copyrights info.

If you load GIF image you can add note
without choosing its type.
```

1.11 About ID

```
About...

Well, about its about and nothing more
about it can`t say.
```

1.12 Author - Yeah, its me

```
Author...

If you want something from me or only
say how beatiful is this program and how
much you like it :)
