```
yuvn.datatype()
```

### 1.2 yuvn.datatype/yuvn.datatype

#### NAME

yuvn.datatype -- data type for yuvn and vlab pictures.

#### FUNCTION

The yuvn data type, a sub-class of the picture.datatype, is used to load and save yuvn/vlab files.

#### METHODS

OM\_NEW -- Create a new picture object from a yuvn or vlab file. The source can either be DTST\_FILE or DTST\_CLIPBOARD.

#### BUGS

#### SEE ALSO

picture.datatype.
