1.3 Introduction

My MultiView has configuration stored in tooltypes from version 1.5. But configuration was very hard work so I started to write preferences program. First versions was unusable - one have GUI, others not etc. In December 1997 I started work on really program. First versions can only read/write configuration but you can't change anything. I send 1st good version to Aminet in January 1998 - it was 1.1 beta.

Then I make many changes in code. After MultiView 4.0 release I wrote new preferences program which can handle all MV 4.0 settings and from then prefs program has the same version as MultiView which it can handle.

1.4 Installation

For installation please use "Install" script supplied with MultiView 4.5 and higher. If you want to do it by hand then just copy program to SYS:Prefs/

1.5 Requirements

System minimum is :

2.04 - to run

Requied libraries :

FileID.library	v.2+	(included with MultiView)
Asl.library	v.38+	(part of AmigaOS)

1.6 Usage

Just run it - it will read SYS:Utilities/Multiview icon.

1.8 History

- 1.1 - first public version
- 1.41 - second public version
 - didn't show NewIcons tooltips
 - you can read any icon
- 2.0 - rewritten program
 - you can disable/enable tooltip by clicking on it
 - you can save to any icon

Lots of changes..

- 4.0 - New GUI - now with tabs - you can configure all MV 4.x
- 4.1 - Added sorting of lists
- 4.4 - Added changing page via keys
- 4.6 - Added datatype types
 - Added window blocking
 - When you add FileID types they are sorted
 - From now program checks is this type already exist
- 4.7 - You can select listview position with UP/DOWN cursors.
- 4.8 - Fixed error from 4.6 version - when you selected anything in filerequster then you have something different inserted into config

1.9 BlaBlainfo

BlaBla is a Polish biggest system programmers group. We make the system friendly programms. We guarantee that our programs will run on almost every machine (Amiga of course), including future ones. All our programs are running in multitasking, and all of them are PD, Freeware, or Shareware.

Our organisation has a few members (we "absorb" only good programmers), an own e-mail address. Our newest productions you can find in our PD library called "Polware". Our texts, articles you can also find in our disk-mag "Izviestia" (sorry, in Polish!).

BlaBla group is well-known in Poland, and programs signed with "Blabla" are for sure very good. We made many productions, we help many young programmers, we write articles to Polish edition of Amiga Magazine, we try to do all, for our beloved computer - Amiga!

Our InterNet HomePage : <http://mops.uci.agh.edu.pl/~lemi/bbhp/>
Alias to that page is : <http://www.blabla.w.pl>
Our contact email address : blabla@zskl.p.lodz.pl

1.10 Credits

In this place I wish to thank few people which gives me help, suggestions, bugreports (without any order) :

- BLOODROCK of TRSI - for great FileID.library
- Fabio Rotondo - for StringNode module
- Wouter van Oortmerssen - for AmigaE - the best programming language for Amiga
- Bogi - for testing every versions of Preferences
