1.19 Directory selection help

```
            You are looking at the age (newest file on top) sorted version of  ←
                the
new files list.  New files means everything that was uploaded since the
previous Aminet CD was made.  Every top level directory is one AmigaGuide
page.  Just click the directory you would like to see.  Help on viewing and
extracting the files is available
                here
                    .
```

You can also do a search from this page. Matches will be sorted by
age.

Press 'Retrace' to get back.

1.20   File view help

In all the index files in Lists/, you can click the archive name to
unpack that archive to the directory selected in 'Prefs' (default is RAM:),
where a new directory will be created for it so you can clean up easily.

The top level 'Index', the 'Readme' and the various Guides are different.
There, clicking the archive name will:

  – View the graphics inside an archive (directory pix/ and gfx/anim/)
  – Play the sounds inside an archive   (directory mods/ and mus/smpl/)
  – Display the texts inside an archive (directory docs/)
  – Extract the archive to RAM: (all other directories)

Also, you can click the description of the archive to view the .readme of
the same archive. Note that entries with a * in front of the description
are not present on this CD (for example in the complete Aminet index).
However if you click them anyway, you will be informed what other CDs
this file can be found on.

Press 'Retrace' to get back.
