Chapter 1

AmiLogVis

1.1   AmiLogVis 1.3

```
                    Amiga RC5 Log Visualizer  by PorneL
   -----------------------

                    Introduction

                    Requirements

                    Features

                    Usage

                    Author
```

1.2   So what does it do?

```
 Amiga RC5 Log Visualizer

This program shows distributed.net clients' RC5 logs.

If it doesn't tell you anything - visit: http://distributed.net, get the
client and join Amiga team - NOW!
```

1.3   Ha,ha,ha

```
 Features

* It does work (in most cases :)
* More detailed output than on PC's, hehe
* You can see how does your client work
* You can quit the program
```

Impressive, isn't it?

1.4 Requirements

 Requirements

* RC5-64 logs (may not work correctly with other contests)
* Client v2.7 or later (tested with 2.8010.463)
* Mode promotor if you want use other monitors or gfx card :(

1.5 Usage - doh!

 Installation and usage

Set logging in your client (dnetc -config, etc.) to file "log.rc5".

If you want to launch AmiLogVis from Workbench, copy it to directory where
rc5 log is (by default it looks for "log.rc5" in current directory).

OR run from CLI optionally supplying path to rc5 log file as a parameter.

1.6 Me

You can contact me by e-mail: pornel@plj.pl
or catch me on IRC #amiga,#amigapl,#amisia,#amypl (what a maniac..:)
