Chapter 1

SpyVsSpy3D

1.1   Ceporro.guide

```
                              Spy Vs Spy 3D

                     Inet multiplayer game

                        Beta Version

                What is Spy Vs Spy 3D?

                    How it work?

                How to write to the autor
```

1.2   What is Spy Vs Spy 3D?

```
     Spy vs Spy 3d

   This is a beta version of a new game, this is only a 3d engine,
and is the first version that I submit to aminet.

   In the future, this game will be very similar to Spy vs Spy, but
with option to play in internet. You will take some objects and figth
with the opponents.

   You can move around the world with cursor keys, and with this version
I submit to a 3d world editor.

   If you have something interesting for this game, please send me an email
```

1.3   How it work

You must load a 3d map and click to start, in this version you cant
do something, because is a very early version. You can move around
the 3d world with cursor keys and space.

If you have a 030 processor, I sugested to you use a workbench
screen in pal with 4 or 8 colors, but if you have a 060 it works
very well.

1.4   Write to the autor

If you have a good idea to the game

You can send me an email to:

balrog@teleline.es

And my web is: www.balrogsoft.8m.com

in this web you can download all my programs.
