1.2 Preface

Preface

~~~~~

Since a few months, I use several startup-sequences, shell-startups and user- ↵  
startups  
for a better use of my Amiga. For example, if I need a lot of memory or if I want ↵  
to

speed up my Amiga boot, ..., I change my startup-sequence file. With different ←  
 user-startups,  
 I can vary the number of assigns. Shell-startups provide me several programming  
 environments (C, E or Java). That's why I've began to number all these files  
 (startup\_sequence1, startup-sequence2, ...) and rename it in startup-sequence,  
 user-startup and shell-startup when i want to use it ... I looked for a software  
 which can manage all the startup files but I didn't found any one :( So I took my ←  
 courage  
 in both hands and decided to program my own utility : StartMeUp was born on  
 January 2000.

Glames of ←  
 Boing ←  
 Attitude.

### 1.3 Copyright

Copyright

StartMeUp is E-mailware ; if you like it and often use it, send-me an email at ←
 the address :

boing.attitude@online.fr

Please write your name, firstname and type of Amiga you have (processor, OS, ←
 ...).

StartMeUp can be included in any spreadings (CDROM, net, ...)

Sources and manual are protected by Intellectual property.
 You can't modify it without written permission.

You use Start Me Up at your own risc.

1.4 Author

Author

~~~~~

Jérôme SENAY (i.e Glames)

- Nationality :  
   . France
- Training :  
   . Computer Science master's degree
- Job :  
   . System analyst
- Known programming languages :  
   . Amos Pro (2.0)  
   . Visual Basic (3.0 et 5.0)

- . JAVA (1.1.6 et 1.2.2)
- . RPG (3.0 et 4.0)
- . C (Amiga, PC et AS/400)
- . Pascal
- . Ada
- . C++
- . Assembler 68000
- . Estel
- . Cobol
- . VP
- . HTML 4.0
- . XML 1.0

and soon : Blitz Basic, E, PHP. Perl

## 1.5 Technical Informations

Technical informations

~~~~~

- StartMeUp 1.25 was developed in C (StormC 3.0) on an A1200 030 18 Mo (OS ← 3.9).

- Programing..... Glames
- Drawing..... Pounard
- Test..... Pounard, Patryk Dâbrowski, Guy Maysonnave and Glames
- Manual..... Glames
- Translating..... french and english : Glames
polish : Patryk Dâbrowski

- Tou need Workbench 3.5 or 3.9 to run StartMeUp V1.25.

- StartMeUp was tested on :
 - . A1200 68030 18 Mo Workbench 3.9

1.6 Installation

Installation

~~~~~

- Create a directory "StartMeUp" and copy all files of StartMeUpV1\_25.lha in ← it.

## 1.7 New features

New features

~~~~~

- Debugging :
 - . Crash if you choose a name containing blanks (spaces).
 - . Window display refresh when you choose another language.

- . Workbench 3.9 compatibility.
- Features :
- . New GUI (based on Wb 3.5 REACTION system)
- . You can link a comment to startup files.
- . Window sizeable, moveable and automatically center

1.8 Use

Use

~~~

Firstable, create all your startup-sequences, user-startups and shell-startups.

### 1/ Startup files addition

=====

- Choose startup file's type you want (startup-sequence, user-startup or ↔ shell-startup).  
by clicking on combo button placed under startup files' list.
- Then click on button "Add".
- Choose a file (thanks to button "Browse" or keyboard) and eventually a ↔ comment. Click on button "OK". Startup file (and eventually his comment) are now in the list.

Note : You can't choose "S:startup-sequence", "S:user-startup" and "S:Shell- ↔ startup".

Comment is not needed.

### 2/ Startup files removal

=====

- Click on a file of the list.
- Then click on button "Remove".

### 3/ Startup files choice

=====

- Click on a file of the list.
- Click on button "OK".
- If reboot mode is enabled, Amiga will reboot ... If security mode is ↔ enabled, a window will appear and you should confirm Amiga reboot.

Note : you can simultaneously choose a startup file for each type.

### 4/ About Author

=====

- Click on button "Infos".

### 5/ Preferences modification

=====

- Click on button "Options"
- After have choosing preferences, click on "Ok" to use it.

Notes :

- . Three languages are available : english, french and polish.
- . "Reboot" mode makes your Amiga reboots when you quit StartMeUp.
- . "Security" mode makes a confirm window appears before Amiga reboot.

6/ Quit

====

- Click on button "Cancel".

## 1.9 Others products of Boing Attitude
