1.17 Directory selection help

You are looking at the directory sorted version of the new files ←
list.
New files means everything that was uploaded since the previous Aminet
CD was made. Every directory is one page. Just click the directory
and subdirectory you would like to see.

Help on the format of the file lists, and on what will happen when
you click the archive name or description, is available
here
.

You can also do a search from this page. Matches will be sorted by
directory.

Click 'Retrace' to get back.

1.18 File view help

Every line in the index format shows the following items:

File   The name of the archive. An archive is several files compressed
            and joined into one big file; see the LhA documentation in
            Tools/Docs if you are interested. Clicking the file name will
            extract it to RAM: or wherever selected.

Dir   The directory inside 'Aminet' where you'll find the named file.

Size   The size in K (1024 Bytes) or M (about 1 million bytes).

Age   The age of the file in weeks at the time the index was created.

C   (Where present) The CD the file can be found on. Note that
            uppercase letters (ABCD) mean Set 1, and lowercase (abcd)
            refer to Set 2. Blank means current CD.

Description The short description of the file If you click it, you'll
            see a longer description. A + sign in front of the description
            says that the longer description contains more than just the
            header lines. A * sign in front of the description says that
            the file is not on the current CD. Clicking it anyway will
            tell you what CD it can be found on.

Click 'Retrace' to get back.
