sunau.datatype()
```

1.2 sunau.datatype/sunau.datatype

NAME

sunau.datatype -- data type for Sun Audio sounds.

FUNCTION

The sunau data type, a sub-class of the sound.datatype, is used to load and save Sun Audio files.

METHODS

OM_NEW -- Create a new sound object from an .AU file. Creating an empty object (DTST_RAM) is also supported and allows you to create .AU files.

DTM_WRITE -- For DTWM_RAW an .AU file will be created. DTWM_IFF is passed to the superclass.

BUGS

Not very well tested! Encodings 1-5 are only not supported.

SEE ALSO

sound.datatype.
