1.2 What is it?

That is it:

This is a Graphic User Interface for the Midifile Player GMPlay. It gives you all needed funktion to a nice GUI, including a playlist with autoplay funktion.

1.3 What does it do?

Supported options:

- Volume - Programmpriority - Mixingfrequency - Playbuffers - Polyphony
- Forcing XG-Mode - Forcing Mono-Mode - Tonefilter - Drumfilter - Midifile-Info
- GMPlay Output

For each Option you have the possibility to aktiviate, deactivat and to not set (NS). If one option is not set, it isn't used in the commandoline, which is used to start the GMPlay. The default by GMPlay is used.

For more information about the options use the documentation, which is included in the GMPlay programmarchive!

Importand: The GmOut-Option must be activated for an ouput from GMPlay directly!

1.4 What is needed?

Requirements:

- Amiga - AOS2.0 or higher - Correct installed GMPlay (GMP-G is tested with version 1.3 and 1.3a of GMPlay) - Midifiles (to listen)

1.5 Installation!

Installation:

Nothing special. Copy the complet directory to the place wherever you want to have it.

1.6 Menu!

Menu:

Project/About Programmers info

Project/Load Midi Open a filerequetser for loading a Midifile

Project/Quit Quit the GMP-G. If a Midifile is playing, it stops! (Same function as the close button of the window)

Project/Quit&Play Quit the GMP-G. If a Midifile is in use, the playing continous!

Config/Load GMPlay Load the GMPlay programm.

Config/Save Save the configuration (Saved options: Buttons, the default directory and the window-possition)

Configs/AutoSave When aktivated, the configs of GMP-G are automaticaly saved on quit.

Control/Start Same function as the play button. It starts the playback.

Control/Stop Same function as the stop button. It stops the playback.

Control/PlayListMenu This enhance the window to show the playlist and options! (Same like PlayList button)!

1.7 Special!

Sepcials:

You can close the GMP-G with the menu "Project/Guit&P". The song, which is currently in use, continious with playing. You can restart the GMP-G and stop the playing with the Stop button. Attention: Playlist is inactiv in this mode.

1.8 Problems

Problems:

1. The 14bit.driver of the GMPlay V1.3a has problemes with old Versions of NewIcons. Install the newest version! 2. If the program quits of an internal error (no error message), so delete the GMP-G.prefs-file and try again. Errors in this file can result in a programm crash, so don't edit them by yourself! 3. The pProgramm doesn't start when the screen-resolution is to small. HiRes-Screen or higher is required 3.

1.9 History

History:

25.11.1998 GMP-G V1.0 First releas.

30.11.1998 GMP-G V1.1 The settings are now saved in the tooltypeliste of the icon.

25.11.1998 GMP-G V2.0 Program with new version of the compiler compiled.
