                     (2:200/210.0)
```

1.2 Introduction

I Saw a cool prg to XenoLink v1.90 called OutBoundChecker.
And checks the outbound for mail to Points/Nodes under that BBS.

And i got hookt directly to this prg. So i decided to write on
for MEBBSNet.

This program is CopyRight, But you may include it on MEBBSNet

Support Sites.

1.3 What You Need

You Need:

Arexx v1.15 (c) William Hayes
MEBBSArexx.Library v1.7 or above
MEBBSNet Bulletin Board System v0.155 or above.

(as you don't no by now this prg is made in Arexx)

If you use the WBStartup Drawer to start arexx.
Please consider this insted as a StartUp to Arexx.
It's The REAL Working one that follows with the Orginal Arexx Disk:
And you never get any big probblems with Rexx Scripts that
not loads the library you need. (like my scripts. I NEVER put)
(a loading sequence to the rexxsyslib and rexxsupport lib in)
(any of my scripts)

```
-->CUT
sys:c/loadlib sys:libs/rexxsyslib.library
if error
   echo "Couldn't load rexxsyslib.lbrary"
   quit 20
   endif
sys:c/loadlib sys:libs/rexxsupport.library
sys:c/waitforport -i REXX
if warn
   sys:c/rexxmast
   sys:c/waitforport REXX
   endif
sys:c/rxlib rexxsupport.library 0 -30 0
-->CUT
```

1.4 Installation

Make a dir called "OutCheck" in your DOORS:
You must have this assigned (sorry for that).
and copy every thing to this dir.

And edit you menu<menynr>.menu and add:

```
Option 'O':
   Function AREXX doors:OutCheck/OutChecker
   end
```

and Your Out directory MUST be Assign to OutBound:

and after all this you are ready to go.

1.5 ConfigFiles

```
OutCheck.cfg:
-------------
3                            <-- How Many Points/Nodes there Is here
2.200.210.3 Peter Falk          <-- 1 Point With Sysop Name
2.200.210.2 Christoffer Jerrebo  <-- 2 Point With Sysop Name
2.200.210.1 Mikael Johansson     <-- 3 Point With Sysop Name

NOTE!

There should NOT be any : or / in the point/node number Only .

OutNames.cfg
------------
Peter_Falk            <-- The 1 name to Access This Door
Christoffer_Jerrebo   <-- The 2 name to Access This Door
Mikael_Johansson      <-- The 3 name to Access This Door

NOTE!

Don't forget the UnderScore ( _ ) between the first and last name.
There can be how many names you want to have in this config
BUT remeber the names listed here is the ONLY one(s) how can
access this door correctly and see the outbound directory.
```

1.6 History

```
version 0.1 Beta
                Checked Every Thing In outbound incl TIC LhA and so on.

version 0.2 Beta
                Added so it wont check Lha, Tic, HLO, FLO, CLO files

version 0.3 Beta
                Added so it wont check LZH,TXT,ARJ,ARC,ZIP files

version 0.3 Beta
                Minor bug fix in output format

version 0.4 Beta
                Added so it shows the bytes of the files to.

version 0.5 Beta
                Added so it shows the REAL node/point numbers to

version 0.6 Beta
                Added Color Output

version 0.7 Beta
                Added so it shows the Name of the Point/Node that is
                set up in the OutCheck.cfg file
```

```
version 0.8 Beta Realese date : 1994-08-04
                Added OutNames.cfg so only that names in this file
                can access this door.
                Code : 3829 Bytes large.
```

1.7 Buggs And Comments

```
                Don't said i don't told you so after you have read this.

DISCLAIMER

This software is provided "as-is" and the
                author
                accepts no responsibility for damage and/or loss of data/equipment
software resulting from the use of this.

BUGS

If you find any BUGs PLEASE let me know so i can fixed them
ASAP.

COMMENTS

If you have any suggestions or comment about this prg.
please contact the
                author
                 .
```

1.8 How to contact the author

```
Snail Mail:
            Mikael Johansson
            Barnstensgatan 5a
            253 61 Helsingborg

FidoNet:   2:200/210.0

1.9 Thankx

```
Thankx
======
```

Thankx goes to:

```
William Hayes     For ARexx , The best language yet.
William Bowling   For MEBBSNet , The Best bbs prg i have seen.
Marco Valk        For Including My Arexx prg to His SendToLine utilly.
Robert Whalstrom  For FusTick,FusEdit,FusAc , we can't run a bbs without
                      them
```
