1.2 Usage notes for the global Fish index

                              Usage notes for the per CD Fish index

Contents

This index shows the Fresh Fish descriptions of those files from the Fish
series that are present on this CD. Every entry contains a pointer to
the according Aminet file. Some of those references may be wrong (since
they are auto-generated). Most of the FreshFish stuff is taken from Aminet
(and the rest is integrated into Aminet as well), so there's a good
chance you'll find what you're looking for.

Unpacking

Clicking on such an Aminet reference will unpack the according file to
the destination directory you select. The contents will not be viewed
(eg. no image display programs are started). If you click on the
'Readme' button, you will see the Aminet readme file for that item.
