Date 33.087 A set of routines for calculating dates.

A collection of routines for calculating dates.  
I have included 52 routines like checking for a leap-year  
or calculating the easter-sunday! Have a look at this :)  
Requires ONLY an ANSI-C-Compiler or a C++ Compiler - this  
means that you could use the C-Source on ALL (i hope so)  
computer-systems!!!

MUI 2.1 Object oriented graphical user interface

An object oriented system to create and maintain graphical user  
interfaces. From a programmer's point of view, using MUI saves a lot  
of time and makes life much easier. Thinking about complicated terms  
like window resizing or font sensitivity is simply not necessary. On  
the other hand, users of MUI based applications have the ability to  
customize nearly every pixel of a program's interface according to  
their personal taste. Includes developers support package and several  
demos.

VisualArts 1.0 A powerful GUI designer

A new powerful GUI designer. Features includes: Menu and List manager,  
Object Master, Insert custom codes into any GadTools or GadTool Menu items,  
primitive drawing tools such as rectangle, circle and lines; Supports

AppWindow and MultiProcessing windows. An intuitive interface unlike other GUIs, unlimited windows can be opened, supports PAL, NTSC, EURO, VGA, AGA screen modes, user preference, automatic history and time interval saving, user configurable source output, and many more features.

AmiCDROM    1.11     ISO-9660 standard CDROM filesystem

A CDROM disk filing system for the Amiga. It supports the ISO-9660 standard and the Rock Ridge Interchange Protocol. The CDROM drive is mounted as a DOS device (e.g. CD0:). You can access files and directories on a CDROM disk by the usual syntax, e.g. "type cd0:foo/readme.txt".

AM        1.0     Maintains users and groups in muFS

AM was written to support the muFS system operator's work by supplying an easy-to-use user interface based on MUI (Magic User Interface) by Stefan Stuntz.

The following gives you a quick overview on AM's facilities:

- \* localized (currently English, German, Netherlands, Norwegian, Portuguese, and Swedish catalogs)
- \* needs and makes extensive use of MUI 2.0 ('muimaster.library' version 7+)
- \* supports the following operations on the muFS system files
  - create new users/groups
  - edit any characteristics of an existing user/group
  - delete users/groups
  - temporarily ban a user from the system
- \* automatically creates new \$HOME directories and installs default files there by executing a user supplied script
- \* checks \$HOME directories (not functional yet)
- \* searches muFS partitions for files with bad owner information and changes them

MoonWalk ?? Moonwalk animation done w/ Imagine 2.9

This is an animation of a lunarnaut taking off from the surface of the moon with his rocket pack and then flying off over some lunar mountains. The animation was made with Imagine 2.9, single frame RGB8-24, then converted to HAM Interlace Overscan Opt-Code 5 with ADPro. I use HAM Interlace Overscan because it looks quite good genlocked to videotape and I have an ECS A3000, no 24-bit graphics card (yet). It is over 2 MB in length. I recommend using View 3.6 for viewing animations and BigAnim if you don't have the memory and need to view it from a harddisk.

FlipIt        1.2       Flip through screens via hotkeys.

Commodity that lets you install hotkeys for flipping through screens. FlipIt lets you specify a hotkey to push the frontmost screen to the back, and a hotkey to bring the rearmost screen to the front. This is useful when using programs that do not have depth gadgets on their screens.

Author: Michael J Barsoom
