Home

membership

Annual memberships are available to the museum in a variety of special interest groups to suit various needs as follows:
Single Adult membership fee: \$300.00
Family membership fee: \$550.00
Special Group membership fee: \$625.00

A new look

Designing a new look for your Web site takes time, and you have enough to do keeping the content of your Web pages current. So use Designer's Club Web Site Templates to freshen up your Web site regularly. The layout and design are already done for you.

Customize it

Your company name is displayed along with your e-mail address. Each Web page has space available to add customized information on your company, either by typing it directly into the HTML document or by pasting text in from other programs. Place holders on each page tell you what to place in the designated area.

Things to see

Some pages will contain an animated GIF to liven up the content. Highlight buttons are used to help identify the page being viewed. Web Site Templates will work in browser versions 3.0 and up. No extra plug-ins are needed to use the Web Site Templates.

Update Monthly

Right on time

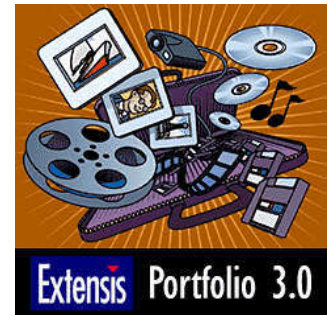

You'll get seasonal Designer's Club art in plenty of time to customize your Web pages before the season starts. A seasonal theme such as holidays, education, business or sports will be featured each month.

Contemporary

Web pages lose readers fast. So encourage frequent visits by keeping your Web page fresh with contemporary art styles.

Electronic index and printed demos

Each month the Web Site and graphics will be catalogued on your monthly DC CD. A demonstration in Designer's Club printed index will display the Web Site and graphics used in that month's Template.

How to use

How to begin

Step 1:

Locate the Web_YMMM folder on your monthly CD. Copy the WebTemp folder to your hard drive. This will allow you to make changes to the HTML documents found in the folder.

Customize the type

Step 2:

Open the first HTML file in your HTML editor program. Look for and replace the text: iCompany Name, "Address, Phone, Fax, E-mail Address" and "Your text goes here".

Files stay in the folder

Step 3:

Repeat Step 2 for each Web page. Match content as closely as possible to the title of the page. Save and replace the files right in the folder. Be careful not to change filenames or move the images in the Images folder, or you'll end up with broken links.

Hand it over

Step 4:

Preview your work in your Web browser, then go back to the HTML editor to make any necessary changes. Present the WebTemp folder to your Web master or service provider.
