

About the Corel Wallpaper Flipper

Corel Wallpaper Flipper automatically changes the wallpaper displayed on your screen each time you start Windows.

The Wallpaper Flipper window contains two list boxes. The Wallpaper Bitmaps list box displays all the bitmap images located in your Windows directory, including wallpaper you create using Corel PhotoCD Lab. From this list, you can select the images that you want the Wallpaper Flipper to use. The Wallpaper Selected list box displays images in the order they're selected. You can preview an image before adding it to the Wallpaper Selected list box.

To select the images you want the Wallpaper Flipper to use

1. Select the image from the Wallpaper Bitmaps list box and then select the **Add** button or double-click the image. Repeat this step for each image until all the images you want the Wallpaper Flipper to use are included in the Wallpaper Selected list box. Or select the **Add All** button to add all the images listed in the Wallpaper Bitmaps list box.
2. Mark the Random Order checkbox if you want the images shuffled and displayed in a different sequence than they're listed in the Wallpaper Selected list box.
3. Mark the Tile Wallpaper checkbox if you want multiple images of the wallpaper displayed.
4. Select the **OK** button.

To preview an image before adding it to the Wallpaper Selected list box

1. Select the image name from the Wallpaper Bitmaps list box.
2. Select the **Preview** button. The image is displayed as your current wallpaper.

To remove an image from Wallpaper Selected list box

Choose the image and select the **Remove** button or double-click the image. Or select the **Remove All** button to remove all the images listed in the Wallpaper Selected list box.

To turn off the Wallpaper Flipper

Select the **Disable** button from the Wallpaper Flipper window.
