

1986 Corvette Indy Research Vehicle

In speculating what the Corvette of the future would be like, Chevy debuted the Corvette Indy Research Vehicle. This 2.65 liter mid-engined V8 came fitted with dual overhead cams, twin-turbos and twin air-to-air inter-coolers. Full time all wheel drive and all wheel steering were other technological advancements included in this futuristic vehicle. A TV screen fitted in the dash displayed the view to the rear.
