PRESENTS:

DIVIDED THEY STAND

Mission Briefing:

Take control of the GDI base in the area referred to as Fork Valley. The base has come under attack, and reconnaissance reports more attacks on the way. Make repairs and build up your forces. Attack all Nod bases, and we will do our best to send in reinforcements.

I would like your feedback on something!

I have downloaded all the help files in the CompuServe library, and found them to be excellent. However, I found them lacking in certain areas, re: teamtypes, specifically with the "templates." I have designed and tested various specific TEMPLATES that work. For example, using the correct templates for creating infantry, correct templates for reinforcing units by cargo planes.

My question is, is anyone interested in having a copy? Let me know…
