# Introduction

Reclaim It! helps you recover disk space lost when time goes by and files begin to gather up on your hard drive. It helps you deal with files you forgot about and even files you don't know existed. Use this application to win back valuable disk space, search for duplicate files, and keep track of new & modified files.

## Search Option

The Search option allows you to find files matching a specific criteria. For instance, you might choose to search for files that haven't been used since 2/1/92 of type BMP or files used since 9/96 of type TMP. File types can also be modified to meet your needs. You may choose to search for ALL files by using \*.\* as the search criteria. Search for only one file type or even multiple types by separating them with semicolons. (e.g. BMP;GIF;RTF;TMP). This sample searches for files containing AS: AS\*.\*

### **Verification Window**

This window allows you to verify and browse each file matching your search criteria. If you do not use this option, files will automatically be deleted or sent to the Recycle Bin.

### **Hidden & System Files**

If you would like to include hidden and system files in your search, use this option.( Note: Removing System files may cause problems so it is not recommended to use this option if you are not familiar with file types.)

## New Files Option

Use this option to search for files installed or modified after your last New Files search session.

## Duplicate Files & Add-Ins

Add-Ins are utilities that can be integrated with Reclaim It! As a registered user you will receive or be notified of the latest Add-Ins free of charge. Some examples of Add-Ins: A utility that removes program names (from the Add/Remove Programs list) that no longer exist. A utility that searches for duplicate files on your hard drive. A utility that checks your Windows Registry for settings that are no longer needed.

### **Duplicate Files Utility**

This Add-In is shipped with the shareware version of Reclaim It! but is limited to registered users only. This file utility searches for duplicate files and produce a text file containing the paths and file sizes of duplicates found. This utility may take several minutes depending on your computers speed and file count.

## Printing and Log Files

Print Option allows you to print search results and/or LOG files. A Log file is created when the user chooses to save the search results.

# End-User Agreement

Important Information Regarding Reclaim It! \*11/96\*

0- User Agreement

1- Program's Purpose

2- Installation

3- Application Category

4- Contacting Author & Keeping Updated

5- Known Problems & Trouble Shooting

0- Israel LeBron and all LeBron II Software software and services are provided "AS IS," and Israel LeBron and LeBron II Software make no expressed or implied representations or warranties to you regarding the usability, conditions, or operation thereof. Israel LeBron or LeBron II Software make no representations or warranties regarding content, and do not warrant the use of this application will be error-free, or that Israel LeBron or LeBron II Software software or services will meet any particular criteria of performance or quality. Your use of all Israel LeBron or LeBron II Software software is at your own risk. You assume full responsibility and risk of loss from all material obtained from Israel LeBron or LeBron II Software. You agree that Israel LeBron and LeBron II Software will not be liable for any damages (including consequential or special damages) arising out of your using or inability to use this or any Israel LeBron or LeBron II Software product.

1- Reclaim It! helps you recover disk space lost when time goes by and files begin to gather up on your hard drive. It helps you deal with files you forgot about and even files you don't know existed. Use this application to win back valuable disk space and keep track of new & modified files.

2- If you are installing the complete version of Reclaim It! Simply run the Setup Wizard (Setup.exe). If you are installing a patch or upgrading Reclaim It! Follow these steps:  
(1) Delete Reclaim.exe from the Reclaim folder  
(2) Unzip Reclaim.zip  
(3) Copy the new Reclaim.exe to the Reclaim folder

3- Reclaim It! is Shareware and can be distributed freely through all normal channels.

4- If you have any questions or comments you may contact the author at [Lebron2@msn.com](mailto:Lebron2@msn.com)

To keep updated on any changes fill out the shareware list form included with Reclaim It! (List.EXE)

5- Reclaim It! will lock up if it encounters a folder containing more that 1600 files matching the search criteria. Chances are that you do not have that many files in a folder (directory)...but if you do, DO NOT specify \*.\* as the search criteria. If it does lock up you have these to options: a)Close the program by pressing CTRL+ALT+DEL and select Reclaim It!  
b)Rename the folder to ZZZZ, continue search. (Don't forget to change back the name when you're done)
